Go to "Your orders" on your Amazon account; 2. Find the corresponding order; 3. Select "Problem with order" and choose the topic; 4. Select Contact seller.	Product introduction Supported Device For iOS Users 1. Supported models: iPhone 8 and later 2. OS requirement: iOS 10 or later 3. [IMPORTANT] Only compatible with 2016+ model year vehicles featuring wired Apple CarPlay For Android Users 1. OS requirement: Android 10.0 or later 2. Requires Android Auto plugin to be installed ✉ termitor@fahren-veh.com	CarPlay Connection Guide Step one: Insert the device into the original car's CarPlay interface. (This device does not show an interface, which is a normal phenomenon) Step two: Use mobile phone to pair the box with Bluetooth WirelessDongle-XXXX. (The mobile phone WiFi needs to keep on-state condition) Step three: After successful connection, the cellphone will pop up a CarPlay vehicle-mounted window. Click "Use" to enter the CarPlay interface. ✉ termitor@fahren-veh.com	Android Auto Connection Guidance Step one: Insert the device into the original car's Android Auto interface. (This device does not show an interface, which is a normal phenomenon) Step three: After successful Bluetooth connection, the device indicator light blinks, click on the original car's central control screen. Android Auto button, you can achieve wireless Android Auto function. ✉ termitor@fahren-veh.com	Troubleshooting ❶ Why does CarPlay fail to connect to the car? (usually caused by Wi-Fi interference.) 1. Testing with Another Device: If convenient, please test the adapter with another iPhone. If only a specific iPhone fails to detect the dongle's Bluetooth or Wi-Fi, please reset the network and Bluetooth settings on that iPhone, then restart the phone once and retry. 2. If the problem occurs with other iPhones, the unit may be defective. In this case, please notify us, and we will issue a refund or send a replacement. ❷ Persistent disconnection. The dongle relies on a WiFi connection to your phone to work. Dropped connections are usually caused by WiFi interference. ❸ To turn off the CarPlay function, you need to disconnect the device's Bluetooth and WiFi on the phone or unplug the box. ❹ If there is a problem with the connection, please restart the car head unit or restore the factory settings of the car head unit. ❺ After the CarPlay connection is successful, the Bluetooth on the phone will be disconnected from our device. ❻ If the car fails to automatically connect again after starting, please delete the Bluetooth and WiFi of this device from the phone's Bluetooth list and WiFi list, and then search for and connect to the Bluetooth of this device again. ✉ termitor@fahren-veh.com	FQA ❶ Why does the car screen go black after pairing? (Wi-Fi does not connect automatically.) We need to connect to Bluetooth, not to WiFi. No password is required for connecting to Bluetooth. Make sure your WiFi is turned on and unoccupied when pairing. ❷ What is the password to connect to Wi-Fi? 1. First-Time Pairing Setup: A. Ensure your device's Wi-Fi remains enabled (no manual connection to the wireless CarPlay adapter's Wi-Fi is required at this stage). 2. Proceed with Bluetooth pairing. B. Successful Connection: Once Bluetooth pairing is successful, the Wi-Fi will automatically connect to the adapter. C. Verification Step: When the screen turns black, confirm whether your Wi-Fi has automatically switched to the adapter's connection. D. If Wi-Fi Fails to Connect Automatically: 1. Unplug the wireless CarPlay adapter. 2. Ignore any "WirelessDongle-XXXX" entry in your Bluetooth device list. 3. Restart your phone once. 4. Reconnect the adapter and repeat the pairing process. Method 2: Ensure your phone's Bluetooth and Wi-Fi are both enabled and not currently connected to other devices (e.g., your vehicle, ... ✉ termitor@fahren-veh.com	Method 3: If the issue persists, attempt updating the firmware and resetting the adapter. How to upgrade the firmware? --- Refer to the after-sales card How to reset the adapter? --- A. Disconnect the adapter; ❶ Why does the car screen go black after pairing? Please check your phones Bluetooth to see if it is connected to another device. If so, please ignore other auto-connected Bluetooth devices or turn off the Bluetooth directly. 2. Clear the programs running in the background of your phone when using the dongle. 3. When on a call check that your "Audio output" option is CarPlay. *Note: Bluetooth plays a pairing role in the work of the dongle. When the pairing is completed it only needs wifi to keep working so it doesn't matter to turn off Bluetooth but when you use it next time, you still need to turn on Bluetooth, so that the dongle can be automatically paired and connected. Instead it shall be handed over to the designated collection point for the recycling of electrical and electronic equipment. ✉ termitor@fahren-veh.com	FCC Warning Statement Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - - Reorient or relocate the receiving antenna. - - Increase the separation between the equipment and receiver. - - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - - Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. RF Exposure Statement To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its accessories must not be co-located or operation in conjunction with any other antennas or transmitter. This symbol indicates that this product shall not be treated as household waste. Instead it shall be handed over to the designated collection point for the recycling of electrical and electronic equipment. ✉ termitor@fahren-veh.com Made in China
