COMPONENT CHECKLIST

Vehicle	x1 PC
Transmitter	x1 PC
Screw	x1 PC

BATTERY INSTALLATION

Amphibious Vehicle

- 1.Make sure the power is off.
- 2.Unscrew and open the battery compartment on the top of the vehicle.And twist the two knobs inside in 90 degrees then you remove the inner protection cover.
- 3.Install the battery set(included) as shown
- 4.Replace the battery compartment cover and tighten it up.

Transmitter

- 1.Make sure the power switch is on the OFF position.
- 2.Slide the battery door as shown.
- 3.Put the 9V battery in the battery compartment as per the polarities shown inside.
- 4.Slide back the battery door as shown.Cover should click when locked in place.

YED1601 (Battery included)

9.6V

ON/OFF

YED1602 (Battery included)

9.6V

ON/OFF

9V BATTERY

INSTALL 1X9V BATTERY

P.2

2.4G Transmitter and Car Matched

2.4GHz remote control need to make sure the "transmitter and car"matched by each other first before using:Turn on the power supply switch on the top of the car,then move the power supply switch of the remote controller to "ON" section,the indicator light will be constant on once they match successfully, then you can start enjoying the car.
Note:If the indicator light flashes continuously,you need to turn off both the car and controller switch then restart until the light is not flashing.

RC Controller

How to Move Forward:

Move both the left and right sticks on the transmitter forward at the same time to move the car FORWARD.

How to Move Backward:

Move the left and right sticks on the transmitter backward at the same time to move the car BACKWARD.

How to Turn Right:

Move the left stick forward and the right stick backward to turn RIGHT.

How to Turn Left:

Move the left stick backward and the right stick forward to turn LEFT.

P.3

Operation on land

Lights are OFF when vehicle unit is switched OFF,LED lights are ON when unit is switched ON,then you could start to operate your vehicle.
The ideal transmission range is 50m.
Pushing two sticks forward to make the vehicle move forward.
Pushing two sticks backward to make the vehicle move backward.

Operation on water

Lights are OFF when vehicle unit is switched OFF,LED lights are ON,when unit is switched ON,then you could start to operate your vehicle.Make sure the waterproof device and battery cover are on a correct position before you put the vehicle on water.
(To avoid fault,do not submerge the vehicle into water.)
The ideal transmission range on water is 20m.
Pushing two sticks forward to make the vehicle move forward. Pushing two sticks backward to make the vehicle move backward.

Important notes

- 1.Charge the rechargeable battery for 3-4 hours per time.The full battery can keep playing for 25 minutes on land or 20 minutes on water.
- 2.When your vehicle starts to lose power,it may lose function or performance.It's time for fresh batteries (or a recharge). Your vehicle's running time may change depending on your driving style.
