SPECIFICATIONS	IMPORTANT SAFETY INSTRUCTIONS				
Frequency Response: 20 Hz~20KHz	Warnings/cautions - Do NOT use the headphones at a high volume for any extended period. - To avoid hearing damage, use your headphones at a comfortable, moderate volume level. - Turn the volume down on your device before placing the headphones in/on your ears, then turn the volume up gradually until you reach a comfortable listening level. - Do NOT use your headphones while driving for phone call or any other purpose. - Do NOT use the headphones at any time the inability to hear surrounding sounds may present a danger to yourself or others, e.g., while riding a bicycle or walking in or near traffic, a construction site or railroad, etc. - Remove the headphones, to ensure you can hear surrounding sounds, including alarms and warning signals. - Be aware of how sounds that you rely on as reminders or warnings may vary in character when using the headphones. - Do NOT use the headphones if they emit any loud unusual noise. If this happens, turn the headphones off and contact UHURU customer service. - Remove headphones immediately if you experience a warning sensation or loss of audio. - Do NOT use mobile phone adapters to connect headphones to airplane seat jacks, as this could result in injury or property damage due to overheating. - Do NOT use the headphones as aviation communication headsets except in case of emergency.	– Incoming audio will be heard with a discharged or improperly installed battery. This could result in the potential of missed communications while piloting an aircraft.	Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.	Regulatory Information  Information on electrical and electronic equipment The following notice is aimed at private end users who use electrical and/or electronic devices.	5. Meaning of the crossed-out dustbin symbol The symbol of a crossed-out garbage can, which is regularly shown on electrical and electronic devices, indicates that the device in question must be collected separately from unsorted municipal waste at the end of its service life.
Impedance: 32 Ω		 Contains small parts which may be a choking hazard. Not suitable for children under age 3.	NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:	 The crossed-out wheeled bin symbol on batteries or accumulators means that they must not be disposed of with household waste at the end of their useful life. Batteries or accumulators contain mercury (Hg), cadmium (Cd) or lead (Pb).	
Speaker Sensitivity: 106dB±3dB		 This product contains magnetic material. Consult your physician on whether this might affect your implantable medical device.	– Extremely loud ambient noise levels common to many propeller-driven aircraft may impair your ability to receive incoming audio communications, particularly during takeoff and climb out.	– Reorient or relocate the receiving antenna.	you will find the respective chemical symbol below the symbol of the crossed-out garbage can. You are legally obliged to return old batteries and accumulators after use. You can do this free of charge at a retail store or at another collection point near you. Addresses of suitable collection points can be obtained from your city or local government.
Driver: 40 mm with independent chamber			– The headphones are not engineered for noise conditions, altitude, temperature or other environmental conditions common in non-commercial aircraft, resulting in possible interference to critical communications.	– Increase the separation between the equipment and receiver.	Batteries may contain substances that are harmful to the environment and human health. Particular caution is required due to the special risks involved in handling lithium-containing batteries. The separate collection and recycling of old batteries and accumulators is intended to avoid negative effects on the environment and human health.
Working Distance: 10 m				– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.	Please avoid generating waste from old batteries as much as possible, e.g. by giving preference to batteries with a longer lifespan or rechargeable batteries. Please avoid leaving public spaces for not leaving batteries or battery-containing electrical and electronic devices lying around. Please explore ways to recycle a battery instead of disposing of it, such as reconditioning or repairing the battery.
Boom Arm Microphone: (Uni-directional) ±93±3dB				– Consult the dealer or an experienced radio/TV technician for help.	
Play Time: 2.4G: 28H BT: 40H				The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.	
Charging Time: 3H					
Battery: 1000 mAh					
Charging: USB C, DC 5V
