

Important Notice

1. Ensure your devices support wireless charging.
2. Use a MagSafe Case or Magnetic Ring if your phone without magnetic suction function.
3. Please use the included adapter and charging cable for optimal performance.
4. Avoid placing any metallic objects on the charging area.

Troubleshooting for Charging Issues

1. If charging is inconsistent, unplug the adapter, wait a few seconds, and plug it back in.
2. A slight increase in temperature during usage is normal and won't affect performance. The device has a built-in temperature safety feature.
3. If abnormal heating occurs during usage, please make sure the device is correctly positioned and avoid any metal objects on the charging area.

How to Use

Phone Cases Guide

iPhone 12-17 No Case

MagSafe Case

iPhone 8-11 No Case

Ordinary Case

Correct Usage

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.
