

Instruction Manual

How to set the correct code by dip switch

You can set our transmitter to any code you desire but be sure that the code you set matches the code which has been set on your radio receiver or transmitter, The digital code is determined by the positions of small dip switches numbered in the receiver and transmitter, Any combination of ON (OPEN) & OFF (CLOSE) positions can be selected by using a small screwdriver or ball point pen.

For example:

1.Original receiver & Transmitter Dip switch set the dip position as below figure

1,2,6,7,8 to be ON position

2.then set our remote on the same position as following figure

1,2,6,7,8 to be ON position

3. If this doesn't work, please try to set it to the opposite position to your original

remote control. Because original remote or receiver may use the different dip switches.

1,2,6,7,8 to be OFF position

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
