

Class II Permissive Change

July 25, 2022

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

Volk Optical Inc. hereby requests a Permissive Change Class II of the radio equipment certification for the Bluetooth module certification number, FCC ID: 2A64W-ESP32WROOM32E. This product differs from the originally approved product in the following manner:

- (a) The Wi-Fi portion of the original module is deactivated by firmware. The module 2A64W-ESP32WROOM32E is used as BLE-only within the Volk VistaView camera, and no BT Classic modes are used. With Wi-Fi deactivated, the RF output power is below SAR Exclusion levels. The intent of this PCII is to use 2A64W-ESP32WROOM32E in Portable applications per KDB 447498 Chapter 4.3.
- (b) There are no changes to the associated digital circuitry.
- (c) There are no changes to the antenna characteristics.
- (d) There are no cosmetic differences.
