

F3 Manual

3 in1 Wireless Charging Stand

Preface:

Dear users, thank you for purchasing this product. In order to further understand the product, please read this manual carefully before use. Wish you a pleasant experience.

Product Details

· Charging stand

- ① Wireless charging area for mobile phone
- ② Indicator lamp
- ③ Magnetic charging area for Apple watch
- ④ USB-C interface
- ⑤ TWS headset charging area

Using instructions:

- Power connected, the device enters the standby state;
- Place the Apple Watch in the Magnetic charging area to conduct wireless charging;
- Put the mobile phone that supports wireless charging on the corresponding charging area for wireless charging.

- Put the TWS headset that supports wireless charging on the corresponding charging area for wireless charging.
- The red light is on when the power is turned on, and goes out after seven seconds.
- Charging the watch, the indicator light is off.
- When charging the TWS or Phone, the indicator lights up green.

How to solve abnormal charging:

- Please confirm whether your mobile phone has Wireless charging function before use;
- Check whether the phone deviates from the wireless inductive charging area of the charger;
- Whether a non-metallic protective case is used for charging mobile phones, and the thickness of the protective case is recommended not to exceed 4mm;
- When metal objects touch the charging area, the charger will automatically identify and provide power off protection.
- When the temperature of the charger is too high, it will automatically start the protection. Please unplug the power supply first and use it after the charger recovers the temperature.

Q & A:

Q: Why is there heating in the charging of wireless charging inductive products?

A: During the charging process, there will be a certain loss of magnetoelectric conversion, which will be converted into heat, causing the mobile phone and charger to generate heat, which is a normal phenomenon.

Suggestions:

- When the device is fully charged, disconnect it from charging in time to avoid a long cycle of charging, which may lead to continuous heating of the device and charger;

- It is recommended to stop running the background software when charging the phone.

Safety Notes

- Use indoor or under dry environment, avoid placing or using in the environment of high temperature, humidity, strong static electricity and strong magnetic field;
- For your safety, please do not use wet hand plug and unplug electrical appliances;
- Avoid putting it in a place easily accessible to infants and children;
- Do not use the product if it is contaminated with water or dirt;
- Non-professional personnel are not allowed to open and repair without authorization.

Specifications

- model: F3
- Interface: USB-C
- Input: 9V/2A
- Watch magnetic charging output: 3W
- Mobile phone magnetic charging output: 10W Max
- TWS headset charging output: 5W Max
- Material: Aluminum alloy
- Size: 142*75*10MM
- N W: 175g
- G W: 301g

Made in China

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
