First Time Use

The toothbrush will wake up by pressing the ON/OFF button for the first time on a brand-new toothbrush. The bluetooth function will be activated and remain on. After installing "Beheart" App, please complete the prompts to complete the connection and settings for the toothbrush;

Install APP

You can installing "Beheart" App from App market. After installing, please search and connctet the toothbrush.

*Tips: The connection in the mobile phone "System Settings-Bluetooth Settings" is invalid.

Toothbrush Settings

After installing the "Beheart" App, connect to Bluetooth (toothbrush vibrates twice when the Bluetooth connection in App is successful), and set the smart recommended mode through the APP. After the setting is successful, the smart recommended mode will become the first mode in the mode list.

Measuring Time/Reminders For Brushing

The default brushing time is 2 minutes, and there will be a momentary change in the vibration state every 30s to remind the user that the tooth area needs to be changed for brushing.

Check Brushing Records In App

After brushing your teeth, the result of your brushing will be displayed on the screen of the toothbrush. After connecting to the App, your more detailed tooth brushing data will be displayed on the homepage.

Power On

Pick up the toothbrush or short press both can turn on the toothbrush(for the first time you need to press the button for 1.5s to turn it on), time will be displayed on the screen, click to enter the initial interface; If there is no action within 20s after the screen is turned on, the toothbrush will automatically shut down.

Switching Mode

You can press and hold the button for 1 second to switch mode before toothbrush running and short press to run the selected mode. During the running state, you can also press and hold the button for 1 second to switch mode, screen will show the corresponding icon and the toothbrush will restart 2-minutes countdown.

Battery Status And Charging

The current power will be displayed when the device is turned on. When the power is lower than 5%, the battery power is Yellow. When the battery power is red, please charge the toothbrush immediately (it's not recommended to use the toothbrush when the power is less than 5%). When the power is lower than 3%, the screen will show the picture of empty power with short press. At the same time, the toothbrush vibrates for 0.5s and does not start. During charging, the screen shows the current charge and breathe light effect. After charging, please be sure to cover the charging port tightly before starting to use the electric toothbrush.

Brushing Modes

①Standard Mode:

Two-minutes brushing with normal strength, reminding of changing areas each 30 seconds, it offers the feedback after two-minutes brushing. The feedback icon will last for 5 seconds before the standby mode.

Brush Head Replacement Reminder

* After connecting to the App, when the electric toothbrush has been used for more than 90 days, the App will actively remind the brush head to be replaced.

Change

Using tips

- ① There will be 3s-strength's change from weak to strong when starting to prevents toothpaste splashing.
- ② During the process of brushing, there will be a short pause 30 seconds intervals to remind you to move to the next quadrant of your mouth. When brushing for 2 minutes, the toothbrush will automatically stop working, and the icon of the tooth area will be displayed on the screen to remind you whether the cleaning area is comprehensive or not.

excellent

good

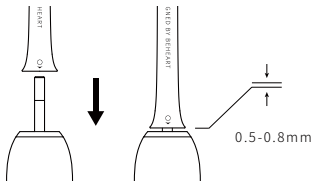

poor

- ③ Short press the button during the running state will pause the operation; and short press again within 20 seconds to continue running; more than 20s of misoperation will enter sleep mode and the brushing result will be displayed on the screen. (When the toothbrush is paused, you can press and hold the button for 2s to end brushing).
- ④ For better cleaning, slowly move the brush head at 45 angles from the bristles to the gums.

Change Brush Head

Make sure that the direction of the bristles of the toothbrush head is consistent with the front direction of the toothbrush handle, and install the brush head vertically downwards on the handle, and ensure that there is a certain gap of 0.5-0.8mm between the two components (to avoid the collision of the toothbrush head with the handle in high-frequency vibration); Do not install the brush head by twisting vigorously.(otherwise, the brush head and body may be damaged.)

Environmental protection

When the electric toothbrush reaches its service life, the internal battery may need to be removed and properly recycled according to the laws and regulations of the country or region where it is located. If the battery cannot be removed, please turn the product to the recycling center designated by the government.
