3. Show Pinned Conversations 4. Show Archived Messages 5. Show Blocked Messages 6. Go to Settings 7. Pin a Conversation 8. Archive a Message 9. Delete a Conversation 10. Mark as Unread 11. Mark All as Read 12. Mute a Conversation 13. Block a Contact from messaging you 14. Schedule a Message to send later You can: - Use the Navigation Pad - Tap directly on the Touchscreen (on touch models) - Or press the number/symbol next to each option using the keypad for quick access. ✉ Starting a New Conversation To start a new message: - Press the Left Soft Key and select New Conversation, or - Tap the blue “+” icon on the touchscreen (touchscreen models only) You'll then be prompted to select or search for a contact to message. ⚡ Quick Key Shortcuts in Messenger From the main Fig Messenger screen: Double tap the Right Navigation Key to mark a message as read - If you've scrolled down the message list, double tap the Left Navigation Key to quickly jump back to the top 📅 Schedule Message What It Does: The Schedule Message feature in Fig Messenger lets you write a message now and choose a specific date and time for it to be sent later. This is ideal for: - Sending reminders - Birthday or holiday greetings - Scheduling work-related messages in advance 🗓️ How to Use It: - Open a conversation and select Schedule a Message from the menu. - Tap the Calendar icon to choose your desired date and time. - Use the Right Navigation Key to move between date and time fields. - Type your message as usual. - When ready, tap Done.	messages, for example). 🔗 How to Set It Up: - Open the Settings menu on your phone. - Tap on Whitelist. - You'll be prompted to create a password. This ensures only you can change these settings in the future. - Once inside, you can: Add contacts to your whitelist (only these contacts will be able to text you). Choose restrictions such as: Allow text-only (block pictures or media). Allow group messages or block them. Customize further based on your needs. 🔒 Whitelist Settings (Recommended for Kids and Controlled Messaging) What it does: The Whitelist setting gives you full control over who can send you text messages. When activated, it blocks all messages except from specific contacts you approve. This is ideal for: Children's phones – to limit communication to family and trusted individuals Focus and productivity – to avoid distractions Privacy and security – to block unknown or spam messages You can also choose advanced options, like allowing only text messages (and blocking picture	🌐 Translate Settings Choose the target language for the Translate feature in Fig Messenger. Once set, incoming or outgoing messages can be translated into your selected language. ⚙️ Advanced Settings In Advanced Settings, you can fine-tune your messaging preferences, including: - Group messaging options - Auto-retrieve for MMS - Auto-retrieve while roaming - SMS delivery reports - And other technical preferences for messaging behavior 💡 Texting Tips & Commands While in a conversation, press the Left Menu Soft Key to bring up quick messaging options: Type Text – Jump directly to the message input field Paste from Clipboard – Instantly insert copied text Save as Draft – Save your message to finish later Open Camera – Take and attach a photo on the spot Attach Image – Choose an image from your gallery Attach Contact – Send someone's contact info Schedule a Message – Set a time to send the message later Conversation Options – Opens additional conversation settings	You can also use touchscreen shortcuts (on touchscreen models): Tap the Paperclip icon to attach media Tap the Emoji icon to add emojis Tap the Microphone icon to record and send a voice note 🗨️ Conversation Options Selecting Conversation Options from the menu gives access to more advanced tools: People & Options – View all shared photos and media, adjust conversation-specific settings like notifications, vibration, and blocking Call the Contact – Initiates a voice call Pin the Conversation – Keep it at the top of your message list Archive Conversation – Move the chat out of your main view Delete Conversation – Permanently remove the chat Translate Setting – Adjust the translation language for this specific conversation 📝 Typing on Your Fig Phone Your Fig Phone offers two convenient ways to type, plus built-in speech-to-text functionality (on supported models): 🗣️ 1. Typing with the Keypad (T9 Mode) - Start typing directly using the physical keypad.	🔊 2. Touchscreen Typing (Touchscreen Models Only) - Simply tap on the text input box with your finger. - This will bring up the on-screen keyboard. - Type as you would on a regular smartphone. 🗣️ 3. Speech-to-Text (Talk-to-Text) Convert your voice into text using either of these methods: - Long press the center OK button for 1.5 seconds to activate speech-to-text. - For touchscreen models: Tap the microphone icon on the on-screen keyboard to begin speaking. Use whichever method is most comfortable—whether it's physical keys, touchscreen, or your voice! 📞 Using the Contacts App on Your Fig Phone The Contacts app makes it easy to manage, call, and message your saved contacts.	Press the left menu soft key to open the options menu. From here, you can: - Create a new contact - Access app settings - Search for contacts - Select multiple contacts (for sharing or deleting) - Share contacts via text message or Bluetooth - Delete contacts 📞 Quick Actions from a Contact Navigate to any contact using the arrow keys. Once highlighted, you can: - Press the Send (Call) button to quickly place a call - Press the Text Message key to start a message to that contact - Press the OK or Edit key to view or edit contact details 🗒️ Notes The Notes App lets you quickly write and save text-based notes and reminders. - Use it for to-do lists, shopping lists, or saving important information	- Notes are saved on your device and can be edited or deleted anytime - Simple and clutter-free interface for easy use 👤 Sound Recorder The Sound Recorder App allows you to record audio directly from your phone. - Ideal for saving voice memos, meetings, lectures, or personal reminders - You can play back, rename, or delete recordings - Recordings are saved in your phone's internal storage and can be shared via Bluetooth or text 🧮 Calculator The Calculator App offers a simple interface for everyday math. - Perform basic calculations: addition, subtraction, multiplication, and division - Great for budgeting, quick math checks, and on-the-go calculations 🕒 Clock The Clock App includes multiple useful features: Set Alarms for waking up or reminders World Clock to check the time in different cities (on supported models) Timer and Stopwatch for tracking tasks or workouts	These tools are designed to be easy to use and enhance your productivity without adding unnecessary complexity. 💡 Setting Up Waze Navigation Prerequisites: - An active data plan (SIM card installed) or Wi-Fi connection. - GPS Location Services enabled. - Enable Location Services (GPS) Before opening Waze, you must ensure the phone allows apps to see your location. - Go to Settings. - Scroll down and select Location (sometimes found under <i>Security & Location</i> or <i>Privacy</i>). - Toggle the switch to On. <i>Note:</i> If prompted to "Improve Location Accuracy," select Yes for the best navigation experience. - Locate or Install Waze - If Waze is pre-installed: Look for the Navigation folder or the Tools menu on your home screen. Select the Waze icon. - If Waze is missing: - Open the App Kiosk (or <i>Store / Applications</i> menu). - Navigate to the Travel & Navigation category. - Select Waze and press Install or Update. - Once finished, the app will appear in your main menu. - Launching Waze for the First Time - Open the Waze app. - Permissions: You will see a prompt asking to allow Waze to access your location. You must select "While using the app" or "Allow". If you select "Deny," the GPS will not work. - Terms of Service: Scroll down and accept the license agreement. - Basic Configuration	Once inside the app, we recommend adjusting these settings to save data and battery: - Press the Search icon. - Select the Gear icon (Settings). - Voice & Sound: Ensure sound is set to "On" if you want turn-by-turn directions. - Battery Saver: Enable this if you are on a long trip without a car charger. Troubleshooting "No GPS" Error: Go back to phone Settings > Location and toggle it Off and On again. Ensure you are outside or in a vehicle, as GPS signals are weak indoors. - App Freezes on Launch: If the app gets stuck on the loading screen, restart your phone to clear the memory and try again. Saving "Home" and "Work" Locations Setting up your Home and Work addresses allows you to start navigation with just one click, saving you from typing the address every time you get in the car. - Set "Home" Address - Open Waze. - Tap on My Waze (usually at the bottom of the screen) or the Menu icon. - Select the Home option. - Type your home address in the search bar. - Select the correct address from the list and tap Set Home (or Save). - Set "Work" Address - Open the My Waze menu again. - Select the Work option. - Type your work address in the search bar. - Select the correct address and tap Set Work (or Save). - How to Navigate To go Home: Open Waze, tap My Waze, and select Home. The route will calculate immediately.	🗺️ How to Use Android Auto with Waze Connect your phone to your vehicle using a USB cable. - Your car's display will launch Android Auto. - Tap the Waze icon on the car screen to start navigation. - Use voice or car screen input to search destinations, check traffic, or follow live directions.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information

This device meets the government's requirements for FCC exposure limits set forth for an uncontrolled environment. This device was tested for typical body-worn operations with the back of the mobile phone kept 10 mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 10 mm separation distance between the user's body and the back of the mobile phone. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
