RE: Justification for label location regarding application for certification of

FCC ID: 2A6CA-OP1

IC Number: 28421-OP1

To Whom It May Concern:

This letter is to justify the choice of label location for the device bearing the above FCC ID and IC Number. The location was chosen to be on the charger case label due to the limited space available on the therapeutic device enclosure. The therapeutic device is relatively small in physical size and has many contoured surfaces. The therapeutic device will be washed daily after each treatment the label on the device enclosure may not withstand the intended period of life.

The charger case is the only logical choice as the therapeutic device must be always stored inside when it's not in use, the charger case shall not be washed, and the label shall remain readable over the duration of the orthodontic treatment. The charger case label consists of all needed information such as device status indication, IP ratings along with other symbols to guide the user on the intended use and care for these reasons, the label will be readily viewable to the device's end-user.

Please contact the undersigned if you have any questions or need any further information.

Regards, 
Marcel Pordes
