PROJECTOR

User Manual

Important Note: Please read the user manual carefully before use and keep it for future use.

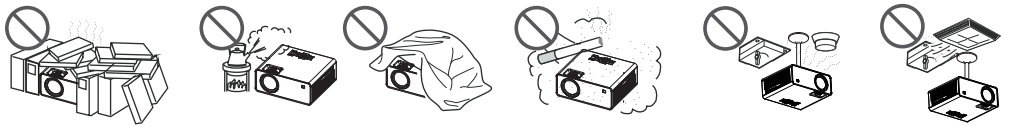

IMPORTANT SAFETY PRECAUTIONS

English

Important: In order to get the best viewing effect, it's suggested that you use the product in a dark room.

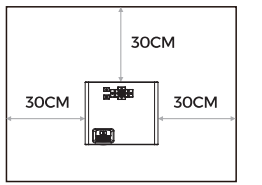

Warning: Following safety instructions can sustain product's lifespan and prevent it from firing or electric shock, so please read them carefully and pay attention to all warnings.

- Do not install it in a place with poor ventilation.
- Do not install it in a hot or damp place.
- Do not block its ventilation holes (Intake or Exhaust).
- Do not install it in a dusty or smoky place.
- Do not install it near to the temperature/smoke sensor, since it might make the sensor fail to work.
- Do not install it in a position directly blown by air condition, otherwise it might be malfunctioned because of the water & vapour condensation or high temperature.

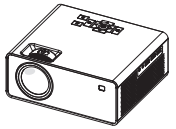

Note: In order to maintain the performance and reliability of projector, please leave at least 30cm of space around the projector.

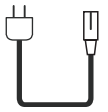

Note: The projector's light is very bright, so please do not look at it directly or point its light to your eyes in case of causing visual damage.

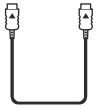

Note: Please check whether the accessories are complete after opening the package.
If it's not complete, please contact customer service for a replacement.

:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,
which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different
from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC’s RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
