子表操作引导

The diagram illustrates the workflow for generating a map. It starts with '数据源' (Data Source), which leads to '数据清洗' (Data Cleaning). From '数据清洗', the process branches into '数据转换' (Data Conversion) and '数据发布' (Data Release). '数据转换' further leads to '数据发布'. The final output is a map visualization.

About music and recording files

Music file

Your machine has built-in memory. If you need to download music, you can connect to the computer through a data cable, open the module U disk, and download the downloaded music to the U disk.

Recording files

Open the recording interface, slide left to the recording playback interface to play and delete.

Connect the watch to the computer, open the U disk and enter the "AS_RECORD" file to find the recording file to play or delete.

Why can't I receive a message push?
 Check phone settings:
 • If the message push switch is turned on in the middle of the confirmation message can be received normally in the notification banner. The search message is only pushed by meeting the notification banner.
 • If there is no message in the removable notification banner, the switch will not be able to activate push (you need to be in the notification setting in the middle phone settings, and turn on the notification switch of WhatsApp/Wechat/Phone, etc.)
 • Check phone settings.
 • If the message push switch is turned on in the middle of the confirmation message can be received normally in the notification banner. The search message can be pushed normally in the notification banner (you need to find the notification settings in the middle phone settings, and turn on the notification switch of WhatsApp/Wechat/Phone, etc.)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
