

LED STRIP LIGHTS FOR CAR

Words From The Product Designer

Hi friends,

This is Mason from Glocusent, and it is so nice to connect with you through our original designed product. When we create the brand Glocusent, we always hope our Glocusent light can shine in different corners of your life. The atmospheres lighting for cars is our next step followed by book reading light, please allow me to introduce our very first car strip light.

What is the main difference from Glocusent car strip light and other car strip lights? Our team got almost all the best-selling strip lights in the market to try their music mode, we found that none of them has a perfect or even remotely nice music mode. The rhythm of the dancing light is just look like it is synced with the music, but disappointedly it is not really. That is why we decided to gather a team to develop our own smart chip and make sure the strip light can match the music better than all other strip lights that are in the market.

After one year, and hundreds of times studying, developing, testing, and re-developing, we finally created the strip light that can carry out the best performance! Confidently saying, the unique music sync effect of this strip light with advanced noise cancellation technology can truly bring you an immersive music and romantic world.

Words From The Product Designer

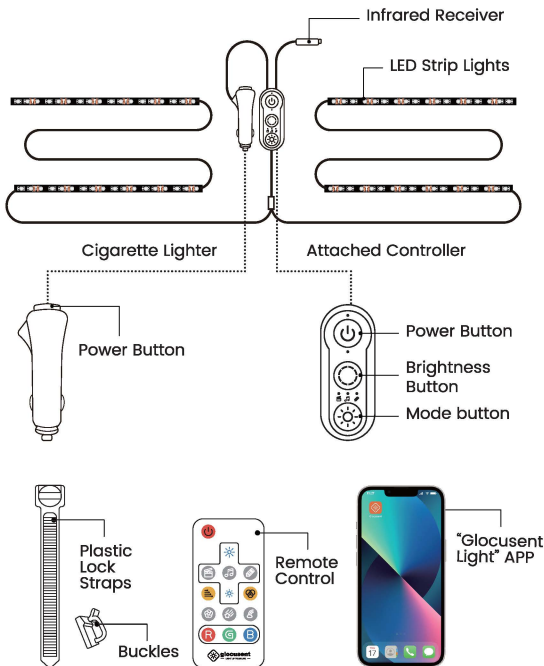

Imaging that, under the blue sky with a clean milky way, you are driving with friends, the car LED lights automatically shine brightness and color followed with the rhythm and melody of your favorite music!

Now, follow our detailed Installation guide, treat yourself with a new driving experience!

Thank you for your support.

Sincerely,
Mason

Product Details

Installation

1. Preparation

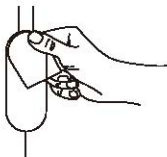

1.1 Open the package and spread the strip lights.

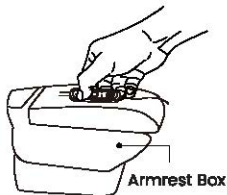

1.2 Plug the cigarette lighter into the cigarette lighter socket of the center console.

1.3 Tear off the 3M glue on the back of the attached controller.

1.4 Stick the attached controller near the armrest box.

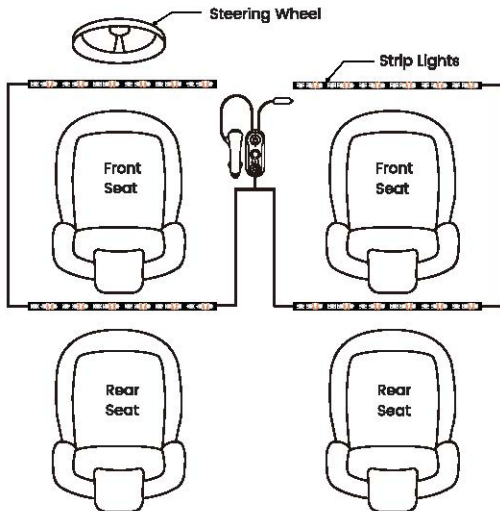

Installation

1.5 Unfold the strip lights and install them in the position shown in the figure below. Please install the 2 strip lights behind the front seat first, and then install the 2 strip lights in front of the front seat.

If the installing surface is cortical, please see step 2.

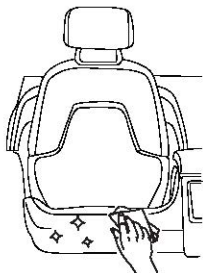

If it is fabric, please see step 3.

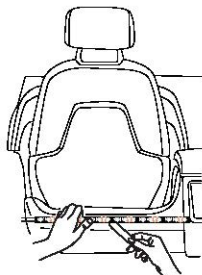

Installation

2. For Cortical Surface

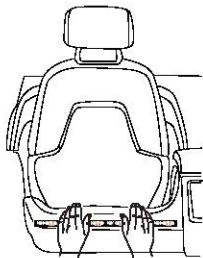

2.1 Clean and dry the cortical surface behind and in front of the front seat .

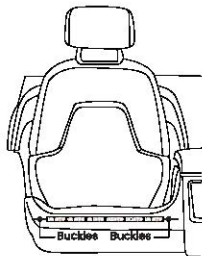

2.2 Tear off the red plastic film on the back of the strip lights.

2.3 Paste strip lights on the cleaned surface and press over it about 10-15s .

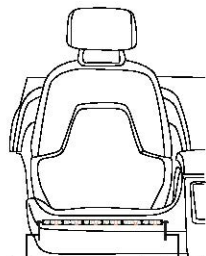

2.4 If needed, use the buckles to fix the ends of strip lights.

Installation

3. For Fabric Surface

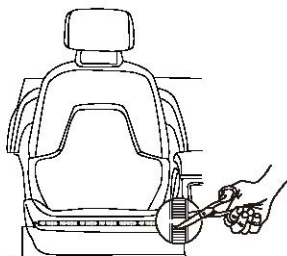

3.1 Use plastic lock straps and pull tightly to fix the strip lights' position.

Plastic Lock Straps

Plastic Lock Straps

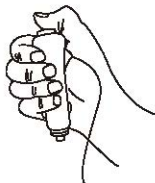

3.2 Use scissors to cut off the extra parts of the plastic lock straps to keep your car tidy.

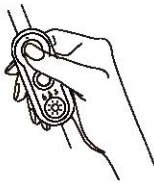

Plastic Lock Straps

4. Light up the strip lights.

4.1 Press the button on the cigarette lighter.

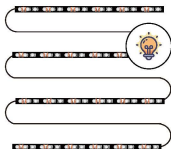

4.2 Press the power button on the attached controller.

Installation

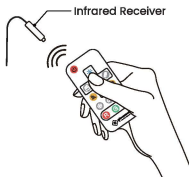

4.3 The strip lights will light up.

4.4 Remove the plastic film from the remote control.

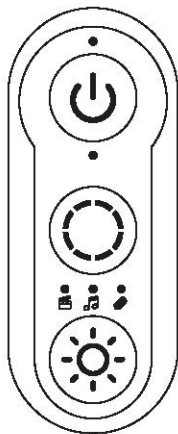

4.5 Always point the remote control towards the infrared receiver when using it to control the strip lights.

4.6 Use the attached controller, remote control and APP to control the strip lights.

Remote Control

“Glocusent Light” APP

1. Download “Glocusent Light” APP in Apple Store (iOS) or Google Play (Android).

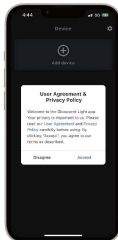

2. Press OK button allow the app accesses to Bluetooth.

3. Make sure both the power of the strip lights and the Bluetooth on your phone are turned on.

4. Back to the APP interface, accept Agreement and Privacy Policy.

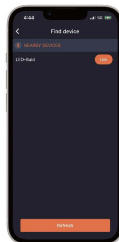

“Glocusent Light” APP

5. Add device, and connect the strip lights.

6. Find device and click the “link” icon.

7. Enter the home page after connection. Slide brightness icon to adjust the brightness as needed.

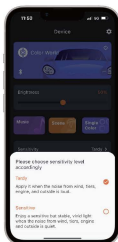

8. There are multiple scene modes, single color, and music mode available for different scenarios for you to enjoy.

“Glocusent Light” APP

9. In music mode, there are sensitive and tardy levels to select. When the environment is quiet, sensitive level is suitable. When it is loud, please select tardy level.

10. In single color mode you can choose different color modes or set different combinations according to your own preferences.

Precautions

- Clean and dry the surface of the object where the strip lights need to be installed. Any dust and liquid will affect the stickiness of 3M adhesive. The surface where the strip lights adhere must be smooth and clean, otherwise the strip lights will falloff.
- Please tear off the red plastic film on the back of the strip lights. Please be careful not to tear off the glue.
- Please remove the plastic film from the remote control before first use. If not, this remote control cannot be used.
- The plastic lock straps and buckles can be used to fasten the strip lights and to hold it on its position.
- Please avoid placing the strip lights in an extreme temperature environment (either too hot or too cold).
- Disposal: When you are ready to dispose of the product after wearing it out, please make sure to follow the instructions of your local government for environmental and safety purposes.

Troubleshooting

1. The LED strip lights don't turn on

1.1 Please make sure the cigarette lighter is power on.

1.2. Please make sure the cigarette lighter is well connected with power plug.

2. The LED strip lights stop working after using for a period

2.1. Please make sure the cigarette lighter is well connected with power plug.

2.2. Please open the APP to make sure the strip lights are switched on.

2.3. Unscrew the bottom of the cigarette lighter, take out the fuse and check whether it's burned.

3. The adhesive is not sticky

3.1 Please clean and dry the surface of the object where the strip needs to be installed.

3.2 Please put the LED strip lights on the clean surface, and press it firmly for 10-15 seconds to make sure it is sticky.

4. Cannot connect to APP

4.1 Please turn on the Bluetooth of your cellphone.

4.2 Please make sure it is connected to the Bluetooth according to the APP instructions.

4.3 If the phone is not compatible, please replace the phone and reconnect the strip lights.

Troubleshooting

4.4 Please make sure the strip lights are in the Bluetooth range of your cellphone.

4.5 Please make sure there is no obstacles between the strip lights and your cellphone.

5. The attached controller doesn't work

5.1 Please unplug the cigarette lighter and then plug it back.

5.2 Please control the strip lights through APP and check if you can adjust color and brightness.

6. Other issues

6.1 If you have other questions, please email us at service@glocusent.com, our team will respond to your email in a swift time.

About Glocusent

Ever since we saw our first sunrise illuminate the beautiful Colorado Springs, we've become a lighting product company that believes that light is a critical element to capturing the magic in moments. No progress was ever made in the dark, and we're here to deliver that light to ensure that our users are always progressing. From neck lights to portable ring lights, every one of our products is designed to provide light in a way that's simple and convenient. At Glocusent, we refer to three core principles; glory, focus, and moments.

Glory: We're about bringing light to your life, and we believe life is filled with **glory**, whether that's in your career or with your family. Let us shine a light on that glory.

Focus: Our team at Glocusent is **focused** on creating innovative lights and lamps that are convenient, smart, and tailored to its user. In the wise words of Roy T. Bennett, "Life is short; focus on what really matters; you should change your priorities over time." With our lights, you can focus on what matters.

Moment: **Moments** are fleeting. Your lives are filled with beauty, romance, and happiness. Our innovative lights are there to help you capture the moments.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC WARNING

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L' émetteur/r écepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d' Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L' exploitation est autorisée aux deux conditions suivantes:

1. L' appareil ne doit pas produire de brouillage;
2. L' appareil doit accepter tout brouillage radio électrique subi, même si le brouillage est susceptible d' en compromettre le fonctionnement.
