Words from the Product Designer

Dear User,

When you place this wake-up light by your bedside, you're welcoming more than just a clock—you're inviting a thoughtful companion designed to improve how you sleep, wake, and feel every day.

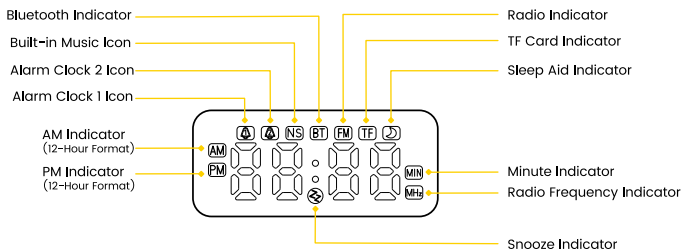

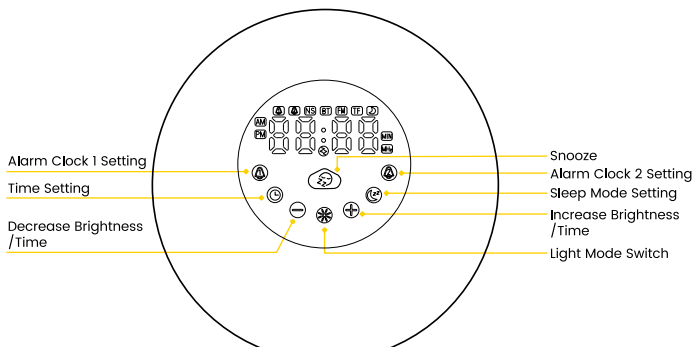

As one of its designers, I'm proud to share the intention behind its creation. We wanted to go beyond a loud alarm or a simple lamp. Instead, we created a **Light & Sound Companion** to help you wake gently, fall asleep peacefully, and enjoy a more balanced rhythm.

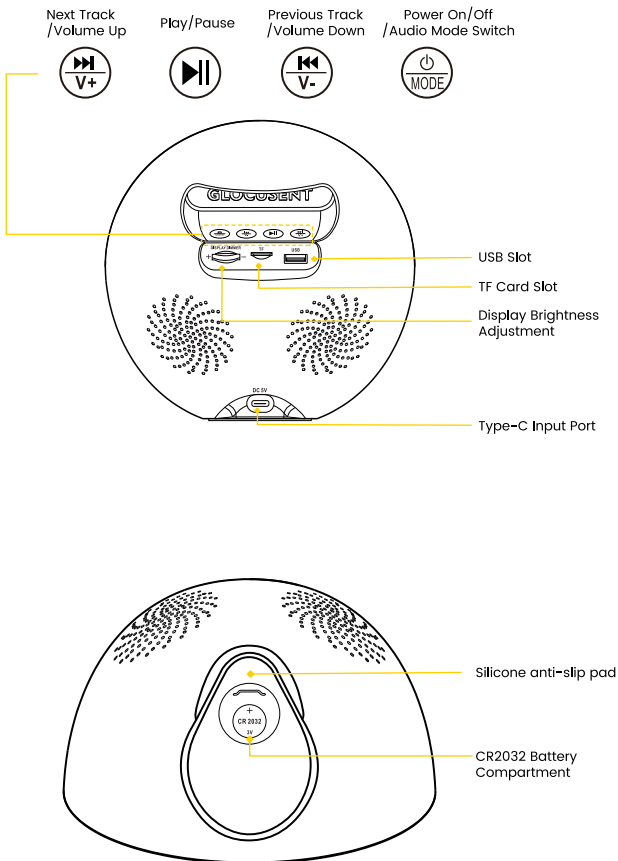

- **Sunrise Wake-up:** Light and sound gradually increase over 5 minutes to simulate a natural sunrise. This helps suppress melatonin and boost your energy for a calmer, healthier start—especially helpful on dark mornings.
- **Sunset Sleep Mode:** Light and sound fade slowly to guide you into deeper rest, with automatic shutoff so you can sleep worry-free.
- **Rich Audio Experience:** Choose nature sounds, FM radio, or your own music via Bluetooth or TF card—day or night, your sound, your mood.
- **Versatile Lighting:** Use it as a warm nightlight or switch to colorful ambient lighting to create a cozy, romantic, or peaceful bedroom atmosphere.
- **Always a Clock:** Dual alarms, adjustable display brightness, and reliable timekeeping are built in for your daily needs.

We hope this light becomes your gentle partner in rest and routine. Give it a little time to get used to, and it just might change the way you begin and end your day.

Warmly,
The Glocusent Team

Instruction

Power on/off

Long Press  ----- On/Off

Next/Previous

Short Press  ----- Next

Short Press  ----- Previous

Volume +/-

Long Press  ----- Volume +

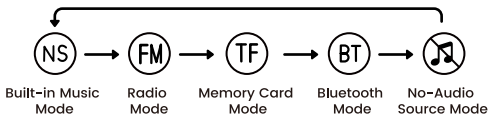

Long Press  ----- Volume -

Play/Pause

Short Press  ----- Play/Pause

Audio Mode Switch

Short Press  to switch audio mode

Built-in Music Mode

When in built-in music mode, the Built-in Music NS indicator lights up, enabling playback of the 14 preloaded tracks only.

Radio Mode

Upon entering radio mode, the FM indicator lights up, and the device automatically plays the first saved station.

TF Card Mode

If no valid TF card is inserted, the device cannot switch to TF mode. Once a TF card is inserted and TF mode is activated, the TF indicator lights up.

Press and hold  to automatically save the first station; upon receiving a valid signal, it will sequentially save up to 15 stations. Once saving is complete, it will return to play the first saved station.

Bluetooth Mode

When connected to another device via Bluetooth, press and hold to  disconnect and make the device discoverable for new pairing.

After entering Bluetooth mode, if no device is connected, the Bluetooth (BT) indicator will blink. Once a valid connection to "N15" is established, the BT indicator remains steadily lit, accompanied by a successful connection sound. The Bluetooth connection features a memory auto-reconnect function.

Clock Setting

Time Adjustment

12/24 Hour Format Switch

Automatic Clock Calibration

Each time a smart device, such as a smartphone, connects to the device via Bluetooth, it automatically reads the time from the smart device and synchronizes its clock accordingly.

Clock Display Brightness Adjustment

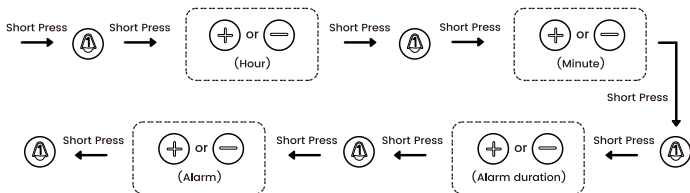

Rotate left or right  to adjust the clock display brightness.

Clock Display When Powered Off

In power-off mode, pressing any button on the front panel will display the clock for 20 seconds.

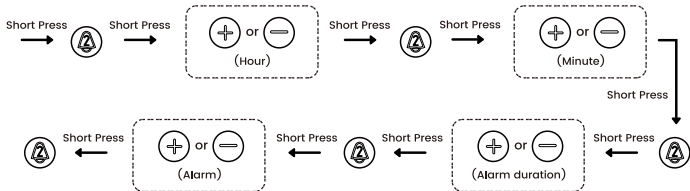

Alarm Clock Setting

Alarm Clock 1 Setting

After completing the above operations, Alarm Clock 1 is activated, and the Alarm Clock 1 indicator changes from blinking to steadily lit.

Alarm Clock 2 Setting

After completing the above operations, Alarm Clock 2 is activated, and the Alarm Clock 2 indicator changes from blinking to steadily lit.

Note: During the alarm clock setting process, if there is no operation for more than 5 seconds, the setting will be automatically canceled, and the display will return to the main page.

On-Time Alarm Clock Activation

Once the set alarm time is reached, the warm light brightness gradually increases from dim to maximum over 5 minutes, while the alarm clock volume synchronously rises from the minimum to the maximum volume within the same 5 minutes, continuing until the alarm clock is turned off.

Alarm Clock Shutdown

Short Press  - - - - - Turn Alarm Clock 1 Off

Short Press  - - - - - Turn Alarm Clock 2 Off

Snooze

After the alarm clock is activated

Short Press  - - - - - Activate Snooze Function

Once the snooze function is activated, the snooze indicator lights up, and the corresponding alarm clock indicator blinks. Both the light and alarm clock sound turn off simultaneously, then reactivate after 9 minutes.

Turn Alarm Clock On/Off

After the alarm clock is activated

Long Press  - - - - - Turn Alarm Clock 1 On/Off

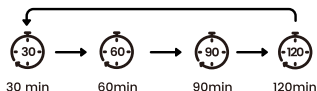

Long Press  - - - - - Turn Alarm Clock 2 On/Off

When Alarm Clock 1 or 2 is activated, the corresponding alarm clock indicator remains steadily lit.

When Alarm Clock 1 or 2 is turned off, the corresponding alarm clock indicator turns off.

Sleep Mode Setting

Short Press  to enable timer and adjust timer setting

Long Press  to disable timer

Once the sleep aid function is activated, the sleep aid indicator lights up, and the light turns on. Within the selected time period, the light gradually dims from bright to dark, automatically turning off when the set sleep time ends. During this phase, the sound system remains active, with the volume gradually decreasing in sync with the light until both are completely off.

Light Adjustment

Light Mode Switch

Short Press  to switch light modes

Warm light Mode

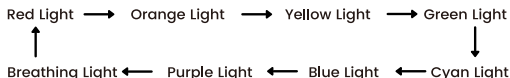

Short Press  ----- Brightness +

Short Press  ----- Brightness -

Or long press for stepless brightness adjusting

Colourful Light Mode

Short Press  or  to switch light modes

Long press  or  for stepless brightness adjusting

Safety instructions

Read and follow the safety instructions below:

- Use a 5V output wall plug to make sure the device is working at its full capacity.
- Please avoid placing this light in an extreme temperature environment (either too hot or too cold).
- The device is not waterproof; therefore, avoid exposing it to splashes or drops of water.
- Avoid installing the device near heat sources.
- Do not install the device near potentially dangerous sources, such as candles, liquid-filled objects.
- Avoid placing the device in high places to prevent it from falling and getting damaged.

Disposal: When you are ready to dispose of the product after wearing it out, please make sure to follow the instructions of your local government for environmental and safety purposes.

About Glocusent

Ever since we saw our first sunrise illuminate the beautiful Colorado Springs, we've become a lighting product company that believes that light is a critical element to capturing the magic in moments. No progress was ever made in the dark, and we're here to deliver that light to ensure that our users are always progressing. From neck lights to portable ring lights, every one of our products is designed to provide light in a way that's simple and convenient. At Glocusent, we refer to three core principles; glory, focus, and moments.

Glory: We're about bringing light to your life, and we believe life is filled with glory, whether that's in your career or with your family. Let us shine a light on that glory.

Focus: Our team at Glocusent is focused on creating innovative lights and lamps that are convenient, smart, and tailored to its user. In the wise words of Roy T. Bennett, "Life is short; focus on what really matters; you should change your priorities over time." With our lights, you can focus on what matters.

Moment: Moments are fleeting. Your lives are filled with beauty, romance, and happiness. Our innovative lights are there to help you capture the moments.

FCC Statm

FCC Certification Info

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference;
- (2) this device must accept any interference received, including interference that may cause undesired operation.
