

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. On the left is the black plastic housing with the green PCB board installed. To its right is the battery assembly, which consists of a black rectangular case with two large, white, oval-shaped coils on its surface. Further to the right is a small, black, rectangular component. A black ruler with white markings is placed horizontally below the components for scale.
Solder Board-Component View 1	 A photograph showing the soldered components on the green PCB board. The board is laid flat, and the two large, white, oval-shaped coils are visible, connected to the board by thin wires. A small, circular, gold-colored component is also visible. A black ruler with white markings is placed horizontally below the components for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components. A circular white component with a black center is connected to the board via a yellow ribbon cable. Several colored wires (red, black, white) are soldered to the board. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 3	 A photograph of the same green PCB from a different angle, showing more detail of the components and the solder joints. The board is still on the blue surface next to the black ruler. The ruler markings are visible, showing measurements from 0 to 100 mm.

Solder Board-Component View 4	 A photograph showing a small green PCB component with a circular silver pad on its top surface. The component is connected to two thin wires, one red and one black, which are soldered to a larger black PCB. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 5	 A photograph showing the same green PCB component from a different angle. The bottom surface of the component is visible, showing various electronic components and solder joints. The component is connected to the same red and black wires. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The background is a blue textured surface.
