Indicator		USB and live interface	Audio interface
15 piece		Digital communication / charge / live accompaniment	Accompaniment, musical instrument, earphone, headphones, condenser microphone
Main battery specification			
Capacity	Electricity consumption	Charging voltage	Charging current
1800mAh	220mA	DC 5V	1A

1.Mobile phone recording, live broadcast

2. Computer live broadcast

After the sound card is connected to the computer and the computer has recognized the sound card

(1) connect the computer to the host computer with the Micro USB cable, click the small horn in the lower right corner of the computer, and right-click to open the "playback device". If the loudspeaker shows "F9" and is the default device, that is, the sound card driver has been installed successfully and has been recognized by the computer.

(2) Computers or other devices that support OTG function and standard USB protocol all support connection with sound card.

The diagram shows the rear panel of the DC3WFA power supply unit. From left to right, the ports are: POWER (a circular power jack), DC 5V (a DC output port), OTG/PC (a USB port), LVE (a DC output port), HEADPHONE (a 3.5mm audio jack), HEADSET (a 3.5mm audio jack), MIC (a microphone input), and a large circular multi-pin connector labeled MIC1. A USB cable is connected to the OTG/PC port, with the other end plugged into a laptop. A label 'Connect to computer USB charging' points to the laptop connection.

Figure (1)

Figure (2)

Figure (3)

1. Turn on the Bluetooth of the mobile phone, as shown in Figure (1);
2. The phone will automatically detect the available equipment around, as shown in Figure (2);
3. After the Bluetooth device "F9" is detected, click to start pairing, and it will be successful in about 10 seconds. The monitor earphone on the sound card will prompt "Bluetooth is connected", as shown in Figure (3), then you can select music Send to the sound card via Bluetooth as accompaniment music.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
