Carplay and Android Auto Wireless adapter

Model: WCA-SQ1

User Manual

Product Overview

The Wireless CarPlay & Android Auto Adapter enhances your driving experience by converting a factory-installed wired CarPlay or Android Auto system into a fully wireless connection. Enjoy smooth, cable-free access to your favorite apps directly from your vehicle's display.

Package Contents

1 × Wireless CarPlay & Android Auto Adapter

1 × USB Type-C Adapter

Specifications

Power Input: 5V - 2.1A

Power Consumption: 0.15W

Output Resolution: Adaptive

Important Note

You can pair the adapter with multiple smartphones; however, it will only connect to one device at a time. If you wish to connect a different phone while another is nearby, please turn off Wi-Fi and Bluetooth on the currently connected device. The system will automatically reconnect to the last phone you used.

Compatibility Requirements

To enjoy wireless connectivity, your vehicle must already have factory-installed Wired CarPlay or Android Auto. This adapter works with most cars equipped with Wired CarPlay or Android Auto and supports devices such as:

iPhone 6 or newer, Android smartphones with Android 11+ and 5GHz Wi-Fi (including Google Pixel, Nexus, Samsung Galaxy, and others)

Car Requirements

Verify that your vehicle supports Wired CarPlay or Wired Android Auto by connecting your smartphone directly with a cable. If CarPlay or Android Auto launches automatically, your car is compatible.

If your vehicle does not include Wired CarPlay or Android Auto, this adapter will not work.

This device does not install or add CarPlay/Android Auto to a vehicle. It only converts an existing wired CarPlay system into a wireless CarPlay or Android Auto connection.

Easy Setup Guide

1 Plug the Wireless adapter into your car's USB port using one of the included cables.

Tip: If your vehicle has multiple USB ports, make sure to use the one labeled for CarPlay or Android Auto.

2 Enable Bluetooth

On your smartphone, turn on Bluetooth and look for "DM-XXXX" in the list of available devices.

3 Pair your device

Select the adapter and allow pairing. Approve requests for syncing and enabling CarPlay or Android Auto as prompted.

4 Select Interface Depending on your device:

iPhone users: CarPlay will launch automatically.

Android users: Choose Android Auto to begin.

5 Interface Ready

Once the connection is successful your CarPlay or Android Auto interface will be displayed on your screen and it will automatically reconnect each time.

Update Process

This action is not recommended if your adapter is working properly.

- 1 Connect your Wireless Adapter to a mobile phone charger.
- 2 Connect your adapter to your phone through WiFi using the password: **88888888**
You need an iPhone and open mobile data.
- 3 Scan the QR Code with your camera or enter **192.168.2.1** in Safari.
- 4 Scroll down to the **upgrade section** to verify your device has the latest software.

Note: *You can disconnect your device once the green light is flashing again.*

If you are having problems please leave us a **detailed problem description** and we will resolve it as soon as posible.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
