Lotag Item Locator Quick Start Guide

Product Overview

Lotag is a smart tracker device that uses Google's Find Hub service, paired with the "Google Find Hub" app on Android devices, to quickly and securely locate your personal items on Google Maps. All location information remains private, and even Google cannot access it.

Before You Start

Lotag only supports the "Google Find Hub" app. Please make sure to download and install this app from the "Google Play Store" before use. The device is compatible only with Android devices running Android 9 or higher. Lotag does not support Huawei devices. Once Lotag is paired with a device, it will be locked and cannot be repaired with another device.

Button and Sound instructions

Power On: Press the button once (O) (a beep will sound)
Power Off: Press and hold the button (O) for 3 seconds (two short beeps will sound).

Reset

1. Open the "Google Find Hub" app, select your Lotag, tap the Settings button, then tap "Remove from Find Hub" and confirm.
 2. After deleting, press the Lotag button five times (O): Press briefly the first four times, then press and hold for more than 5 seconds on the last time. Once you hear a long beep, the device will reset. (The sound of a successful reset is the same as the startup sound; if it fails, two beeps will sound, the same as when shutting down, and you will need to restart the device and reset it again.)
 3. Press and hold the Lotag button again (O). You will hear two short beeps! Release the button. The device is now turned off (Data can only be deleted after turning it off).
 4. Restart Lotag and bind the new device.
- Note: Please power on the Lotag and remove the device from the "Google Find Hub" app before resetting. Fast Pair Instruction

Add Lotag

1. Make sure your phone's Bluetooth and network are turned on.
2. Press the (O) button once to turn on Lotag (a beep will sound).
3. Bring Lotag close to your Android device and wait for the pop-up to show Lotag. (Remark: If no pop-up appears, please restart your phone and try again. If you missed the pop-up window, you will find instructions on the third page.)
4. Tap "Connect", read and accept the prompts to complete the pairing.
5. In the "Google Find Hub" app, select "Lotag" to customize the device name and category.

Manual Set Up Instruction (If you miss the pop-up)

1. Open Settings.
2. To "Google".
3. Click on "All Services".
4. In the "Connected Devices & Sharing" menu, select "Devices".
5. Enable "Scan for Nearby Devices".
6. Lotag will appear in the list of available nearby devices.
7. Click on it and follow the on-screen instructions to complete the connection.
8. Open the Google Find Hub app.
9. Reset the Lotag device → pop-up window → click "Connect."

Find Nearby

In the "Google Find Hub" app, select your Lotag and tap "Play Sound" to locate your device. Once found, tap "Stop Sound" to silence the device. Find Far Away

In the "Google Find Hub" app, select your Lotag, tap the device to view its location. To navigate to the location, tap "Get Directions" to open map navigation.

Enable Lost Mode

In the "Google Find Hub" app, select your Lotag and tap "Mark as Lost". Add your contact information and you will get a notified if the Find Hub Device network locates it.

Lotag Location Sharing:

In the "Google Find Hub" app, select your Lotag, then tap "Share Device". Connect to another phone. After complete the reset process, then connect to another Android phone.

Detailed description

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not

installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction

Product Instructions:

- 1: For Android devices, please make sure your phone is running Google Android 9.0 or higher.
- 2: For Android devices, the Google Android account and the "Find Hub" account must be the same.
- 3: Phone Settings: For Android devices, please tap: → Turn on Bluetooth → Turn on Wi-Fi → Google Services → Sign in to your Google Account → Download "Find Hub" → Turn on "Search for nearby devices" → Open the app → Open all apps → Google Play → Permissions → Location → Turn on "Allow while using" → Google Services → Turn on → Open System → System Updates → Check for updates → Turn on "Find Hub" → Use network search → Allow location search → Search for offline devices → Turn on "Use Network Everywhere" → Connect
- 4: If the pop-up window still doesn't appear on your phone, please update your GSM service (note: this is not an operating system update, but a separate update for Google Services). After the update is complete, restart your phone.

Statement

a) The statement "Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate." b) The statement "Even used batteries may cause severe injury or death." c) The statement "Call a local poison control center for treatment information." d) A statement indicating the compatible battery type (e.g., LR44, CR2032). e) A statement indicating the nominal battery voltage. f) The statement "Non-rechargeable batteries are not to be recharged." g) The statement "Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns." a) The statement "Ensure the batteries are installed correctly according to polarity (+ and -)."

Battery Replacement

1. Rotate your fingers towards the OPEN direction to remove the battery and replace it with a new CR2032 battery. Ensure that the front of the battery is facing upwards (CR2032 coin shaped battery, text facing upwards).
 2. Carefully close the Item Locator by aligning the top hole on both sides.
 3. If there is no sound, please check that the battery is installed correctly.
- *After replacing the battery, you can use the device without reconnecting it.
