

- 1 Power Tower
- 1 User Manual

(Taking the 3-layer for example)

AC Input/Output	10-240V, 50 / 60Hz, Max 15A
Rated Power	1875W (10-125V) / 3750W (270-240V)
USB Output	5V/1A-2A (can vary) 2-40W (4.5V, Max 3A) / 10W (5V) 3-40W (6.0V, Max 4.8A) / 20W (5V)
Wireless Charging Output	5W
Surge Protection Index	950V
Cord	6.5ft
Coating Material	Polyacrylonitrile (Pc)
Cable Material	Copper (Polyvinyl Chloride (PVC))
Fire-Resistance Rating	UL94V-0, 182°F
Certifications	FCC, RoHS

***Note:** The rated power of this tower is 6025W (3625W=1625W) under US/CA voltage (110V~250V). If this power tower is used in other countries and regions with proper plug adapters, its rated power may vary according to the local voltage (e.g. 2860W/220V, 3120W/240V).

[illegible]

- Note:** If Charging does not occur, adjust the phone so its receiver can be detected. Please note that different model phones have their receivers in different positions.

	Red	Green	Blinking Red
Wireless Charging Indicator	Wireless Charger Power ON	Charging	Wired Interference Detected

PROBLEM	POSSIBLE CAUSE	SOLUTION
No power. Indicators don't light up when power buttons are pressed down	Bad connection Power tower overloaded (see reset button page 41 to be flush with the bottom)	Check and reconnect to a live wall outlet Unplug all devices and wait a few minutes; press down the red overload reset button

PROBLEM	POSSIBLE CAUSE	SOLUTION
No power; indicators don't light up when power buttons are pressed down	Power tower overloaded (red reset button pops up to be flum with the bottom)	Unplug all devices and wait a few minutes; press down the red overflow reset button

- **Notes:**
- Do not connect the power tower to an un-grounded wall outlet.
- If playing & unplugging the devices with their own switches turned off could effectively reduce sparking.
- To find out whether your phone or tablet is compatible with wireless charging, please refer to its website or user manual or contact our helpful customer service by sending us a buyer-seller message.
- Unplug the power tower and the connected devices before you pull out or reinsert the cord.

We back our products with a free **1-year** warranty. If there is something wrong with the product you purchase under normal use, please contact us within the warranty period for a solution.

Note: accidental or intentional damage is not included in the warranty coverage.

As one of ARACKY's core sub-brands, SUPERJANNY is dedicated to providing intelligent, universal and high-speed charging equipment around the world. We satisfy consumers' various needs for power connection while helping you save space at home and in the workplaces.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
