Projector User 's Manual

M9

A0

Precautions

- Before using the product, please read the instruction manual carefully and keep it in a safe place for emergency use.
- Please use the machine carefully, and do not drop or hit it at high altitude during transportation to avoid damage to the original machine. Please put on the lens protection cover after use to avoid scratches.
- Please use the standard power cord for power

High temperature

- When the projector is working, it is forbidden to block the air inlet or outlet to avoid damage caused by the high internal temperature of the machine due to poor ventilation.
- Do not look directly at the projector lens with your eyes to avoid damaging your eyes due to strong light.

Electric shock prevention

- In order to prevent electric shock, if there is any problem with the product, please do not disassemble it by yourself (there are no customer-serviceable parts in the machine), please contact professional maintenance personnel for assistance.
- To prevent fire and electric shock, do not expose the machine to rain or moisture.

Working environment

- Only applicable to areas with an altitude of 2000 meters and below.
- Suitable for tropical climate conditions, the maximum allowable ambient temperature is 35 °C.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
