

•Product Instruction

Thank you for choosing our product. The unique streamlined design of the appearance conforms to the public aesthetic. The aluminum alloy and high-strength engineering plastic shell are perfectly combined, sturdy and durable. Equipped with RGB color light mode, it can adjust hue, saturation, CCT mode, special effects, and can define more than 30,000 colors to meet various user needs and achieve multi-scene settings to show the color-changing effect. It is an indispensable device for photography, video, live streaming, color calibration, and other occasions. The light can be controlled and adjusted through the APP, making operation simple and convenient.

•Product Detail

- 1 LCD Display
2 Adjustment Knob

3. Long press (Adjustment Knob) for Bluetooth reset.
4. In color temperature control mode, short press (Adjustment Knob) to adjust brightness, color temperature, and rotate to adjust the corresponding parameters.
5. In RGB control mode, short press (Adjustment Knob) to adjust the color range from 0-300°, press (Adjustment Knob) again to adjust saturation, and press (Adjustment Knob) once more to adjust brightness from 0-100%. Rotate to adjust the corresponding parameters.
6. In special effects control mode, short press (Adjustment Knob) to select from 30 different effects, press (Adjustment Knob) again to adjust brightness from 0-100%, and rotate to adjust the corresponding parameters.

③ Function Mode

Short press the (Function Mode) to switch between color temperature mode, RGB control mode, and effects mode.

Direct Color Temperature Mode

RGB mode

Special Effect Mode

Special Effect Types

F1	Flashlight	F11	Strobe-3
F2	Strobe-1	F12	Slow Speed
F3	Candle	F13	Medium Speed
F4	Flame-1	F14	Fast Speed
F5	Flame-2	F15	Firefighting-1
F6	Police Car	F16	Firefighting-2
F7	Ambulance	F17	Firefighting-3
F8	Fire Truck	F18	Club-1
F9	Strobe-1	F19	Club-2
F10	Strobe-2	F20	Romantic

④ Power Switch

Press and hold the (Power button) for 1 second to turn on/off the power.

⑤ Battery Release Button

Hold down the battery release button and push the battery upwards to remove it.

⑥ Battery Compartment

BPV type 14.8V battery rated voltage 14.8V, battery voltage range 13-16.8V
BPV type 30V battery rated voltage 30V, battery voltage range 28-33.6V

⑦ Power Input Port

⑧ L-Shape Hole

⑨ Bracket Base

The bracket battery needs to be installed firmly. After installation, it is important to check if the battery is securely locked in place and will not come loose. Due to the long lead management process, the LED is not compatible with some remote controls.

•Technical specifications

Model	V-L20C
Power Consumption	1200W
Color Temperature	2700-6500K±500K
CRI	>95
Hue	0-300°
Dimming range	0%-100%
Saturation	0%-100%
Brightness Range	0%-100%
Light source	High-power COB lamp beads
Special effects	20 kinds
APP Control	Support control
Available Battery Models	V-type BP series 14.8V/20V/30V 1835mm batteries
DC Power Input	DC18V 6.3A
Dimension	121*121*135mm (without L-shaped hole)
Net weight	1350g±5g

Brightness test data

CCT	2700K±50m	6500K±50m
(Illuminance (5m light source))	1000lx	6000lx

*Light parameters are average data and there will be slight differences of different lights. The above parameters are based on standard laboratory test data and are subject to change without notice.

•Maintenance and Precautions

- Please use the maintenance instructions for the product.
- Water or other liquids should not be dripped into the product during use, so as not to cause internal circuit short-circuit and damage to the product.
- Do not use more than the rated voltage.
- The light body is slightly warm as a normal phenomenon.
- When moving or installing, need to be handled gently, do not hit other objects, so as not to cause deformation of the lampshade or lamp body damage.
- Photography / video / LED lights, please do not look directly at the light, to avoid eye injury.
- Avoid placing the photo / video light in such as alcohol or gasoline and other flammable or volatile solvents nearby.
- Please use a soft cloth to clean the photo / video light, you can use a cloth slightly on some neutral detergent.
- If the light is used for a long time when not in use, please cut off the power.
- Please observe this precaution, otherwise it may lead to injury.

EN

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
