

FCC Class II Permissive Change Letter

Permissive Change Letter

Date: 19 October 2026

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046
USA

Subject: C2PC for FCC. Accommodate a pre-certified module into host device and SAR evaluation for host integration.

FCC ID: 2A74O-737B5B

We, Morse Micro Pty Ltd, are herein submitting a permissive change filing for the following change.

Accommodate the pre-certificated module MM8108-MF15457 (FCC ID: 2A74O-737B5B) into the HaLow Dongle (Models: MM-U0-C)

The purpose of this Class II Permissive Change is to evaluate SAR compliance for the host integration configuration.

The certified module is used without modification, and the RF characteristics remain identical to those of the certified module. No changes have been made to the RF circuitry, operating frequencies, modulation characteristics, output power, antenna design, hardware, or software that could affect the original RF or EMC compliance.

The host device is intended for professional installation only. Installation, antenna selection, system configuration and country settings are controlled by professional installers and cannot be modified by end users.

Sincerely,

Chad O'Neill
VP of Applications
Morse Micro Pty Ltd
