Q&A Trouble Shooting

Question	Solution
Fail to connect to the network	1. Please use original USB power adapter to supply power. 2. Make sure the phone and router are as close to the device as possible. 3.Make sure the phone's WLAN and Bluetooth are turned on. 4.Make sure the correct device is selected [Small Home Appliances-Pet Feeder(WiFi)] 5.Make sure the indicator light flashes blue when connected (if the indicator light is another color, you can long pressing [+] on the feeder for 10s to reset the device).
Timed tasks are not executed correctly	1. Make sure the device is not reset or powered off. 2. Check if the feeder is offline, when normally connected, the feeder indicator is always on blue. 3. Check whether the effective period of the timing task is set correctly. 4. Check whether the time zone of the time zone of the same as your time zone.Online status, click - ⚙ "Device Information", check the time zone of the device. 5. After the above problems are eliminated, please reset the device and then reconnect.
Does the feeder dispense food when it is offline?	The chip of the feeder has a memory function, the device will continue to dispense food according to the schedule.
How to reset the device?	Long press the [+] button on the feeder for 10 seconds until the indicator changes.
How to view MAC address?	Online status, click - ⚙ "Device Information", to check MAC address.
Why do the batteries not seem to last?	Due to the need for networking, power consumption is high. For ensuring that the device can still maintain normal networking and normal operation in the event of a power outage, the batteries will be consumed so quickly. We recommend ensuring dual power supplies.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
