HNK

Dual-band WiFi6 AX3000 Router
Flow AX3006

Quick Start Guide

Usage safety notice

The following is the requirements for the correct use of the product. To prevent danger and prevent property from being damaged, please read carefully and strictly observe it when using it.
Operating requirements

Danger

- It is best that the working ground of the device is not shared with the grounding device or lightning protection grounding device of the power equipment, and should be as far away as possible.
- Please use the supporting power supply with the product, and it is strictly forbidden to use other non -supporting products. The power supply voltage must meet the input voltage range of the special power cor

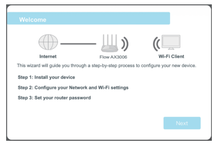
Notice

- This device is only allowed to be used indoors, and it is placed in a dry and ventilated place. Please place the device on a stable countertop, otherwise once it falls, it will damage the device to the device.
- During the installation and use of this device, the electrical safety regulations of the state and use areas must be strictly complied with.
- When operating this device in wiring, disassembly, etc., please break the equipment power supply. Do not operate with power.
- Please ensure that the work environment of this equipment is cleaned. Excessive dust can cause static electrostatic adsorption, which will not only affect the life of the equipment, but also cause communication failures.
- The access to the Internet may face network security issues. Please strengthen the protection of personal information and data security. When you find that the device may have hidden dangers of network security, please contact us in time.
- Please understand that you have the responsibility to reasonably configure all the passwords and other related product security settings, and properly keep your username and password.

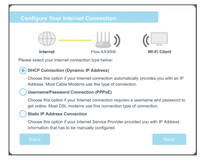
Setup Configuration Wizard

Step1: Connect your phone to the router's factory default wirelessName (you can find it on the product specification label at the bottom of the router).

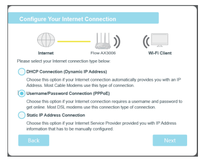
Step2: After the connection is successful, open the browser manually and enter 192.168.0.1 in the address box to log in to the management page

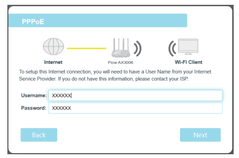


Step3: Select an Internet access mode based on the actual situation and enter related parameters
DHCP:

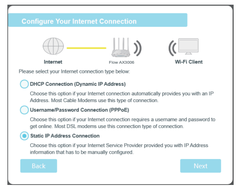


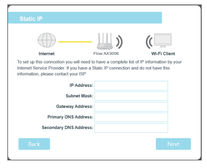
PPPoE: input username and password



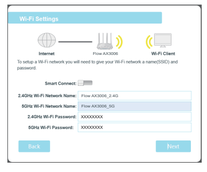


Staic：input IP address，mask，gateway，dns





Step4: Setting the Wi-Fi name and password and click "Next"



Step5: Setting Admin Password，click"Next"

*If the wireless connection is down, reconnect to the network with a new wireless name and password.

Q&A

What can I do if I cannot open the admin interface of my router (192.168.0.1)?

If you log in through wired connection

- Make sure your computer is "Automatically obtain IP Address" and "Automatically Obtain DNS Server Address".
- Make sure that the computer is connected to the router's LAN port and that the corresponding indicators of the router and computer network ports are on.

If you log in through WI-FI connection

- Make sure your Internet device is connected to your router's wireless network.
- Try closing and reopening the browser, clearing the browser cache, or switching to a different browser.
- Replace another Internet access device. If the Internet access device is wired, you can also replace the network cable.
- Power on the router again.

If the fault persists, restore the router to factory Settings or call the technical support hotline.

How do I restore router to factory Settings?

In the power-on state, press and hold the "Reset" button on the rear panel of the router for more than 10s to release, and all indicator lights will be fully lit and turned off.

Note: The router configuration parameters will be cleared after the factory Settings are restored. You need to configure the router again.

Warnning

Please make sure that the wireless router is correctly set. Do not use Chinese or special characters in the wireless name.
Make sure that the wireless name selected and the wireless password entered are correct (case sensitive) when making a wireless connection.
If the fault persists, restore the router to factory Settings or call the technical support hotline.

FCC warning:

This device complies with Part 15 of the FCC rules. Operation is subjected to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
The distance between user and products should be no less than 20cm.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTES(技术要求)：

1.尺寸：成品尺寸：70* 105mm，展开尺寸：350*105MM，公差:±1mm.
2.材质：70g书纸，左右风琴折，双面黑白印刷.
3.环保满足迈腾《MTN-WI-G-010 限用物质管理规范》最新版本要求。
