

Receiver inside mouse

KM9000
WIRELESS KEYBOARD
AND MOUSE INSTRUCTIONS

English

Keyboard Parameters

Dimension: (L)368mm*(W)138mm*(H)22mm

Weight: 315±15g

Button Resilience: 55±7gf

Button Service Life: 1000 Million Time

Power Requirement: 3V DC(Battery Powered)

Working Current: 5mA

Operating Conditions:

Temperature: -10℃~50℃

Humidity: Not Higher Than 85%RH

Mouse Parameters

ZKEY+Scroll Wheel: 3D MOUSE

Power Requirement: 3V DC

3D Button Operating Force: 80±20gf

Switch Service Life: 5 Million Times

Dimension: 112.82mm(L)*57.23mm(W)*22.41mm(H)

Weight: 65.6±10g

Operating Conditions:

Temperature: -10℃~50℃

Humidity: Not Higher Than85%RH

Sensor Copy Tracing Speed: 4500 times / sec

Switch Operating Force: 70±10gf

3D Button Operating Force: 100±20gf

Sensor Tracking Speed: 30 IPS

Keyboard Technical Features

1) Low voltage alarm design.

2) With advanced 2.4GHZ wireless technology, the using distance is up to 8-10M.

3) Use two AAA batteries,the battery life is up to six months.

4) The interior of the keyboard is adopted a noise reduction design.Unique and advanced design of water outlet to prevent splashing.

5) The material is wear-resistant and the characters are etched with radium engraving technology, which is durable, anti-inking, ergonomic and comfortable to the touch.

6) This keyboard is 102 KEY (not including multimedia) membrane switch keyboard.

Mouse Technical Features

1) Nano mini receiver, plug and play.

2) With advanced 2.4GHZ wireless technology, the using distance is up to 8-10M.

3) Use two AAA batteries,with power on/off switch.

4) Superior 4 level intelligent power saving mode,which enable the battery last for six months or even more.

5) Adopting new generation photoelectric IC, 1200DPI high precision optical tracking engine, one-button cycle adjustment 1200/1600.

6) A hidden wireless receiver storage is built into the mouse, which is convenient to carry and can avoid the loss of the receiver.

Operating System

Windows XP, Windows ME, Vista, Windows7, Windows8, Windows10, Mac

Note:

Because of the open wireless, the 2.4GHZ is highly susceptible to interference codes that cause the mouse to malfunction.If this problem occurs, follow these steps to reconnect.

Keyboard:

1) Turn off the receiver of the computer and put the receiver into the computer port.

2) Press "ESC" and "+" "-" buttons for 5 seconds at the same time.

3) If the low light of keyboard flashes quickly,that means the connection succeeds.

Mouse:

1) Take down the receiver and the batteries from the computer.

2) Put the receiver into the computer port and install the batteries into mouse.

3) Press on the right and left click buttons of the mouse and scroll the wheel for 10 seconds at the same time.

4) If the bottom of the mouse lights up, the connection is successful.

Note:If the first code is not successful, please repeat these steps.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operator is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
