Accessories

Charging

1. Plug in

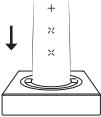

Display during charging - gear light display: the 3 gear lights flash in sequence while charging.

- When the 1st gear light flashes, indicating that the charge is not 1/3 full.
- When the 1st gear light is always on and the 2nd gear light is flashing, indicating that the charge is not 2/3 full.
- When the 1st and 2nd gear lights are always on and the 3rd gear light is flashing, indicating that the charge is less than 3/3 full.
- When the 3-stop light is always on, it means the charge is full.

2. Place the charging base on a level table.

3. Toothbrush inserted upright into charging base (as shown).

4. When charging is complete, unplug the power cord.

- 2 -

Usage and mode

※ There will be slight discomfort at first use, but you will get used to it after many uses.

1. First attach the brush head to the toothbrush body.

* Be sure to insert the toothbrush body vertically, do not twist the brush head.

2. Apply toothpaste to the brush head.

3. Press the button "on/off" to start the toothbrush.

4. Press the button "on/off" to switch the mode you want (5 modes).

5. Press the button to switch the gear you want.

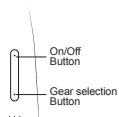

* 3 levels, 1 level is recommended for first use, gradually upgrade the level after getting used to it.

6. Shut down:

① Within 5 seconds of the selected mode, press and hold "Power On" to turn off the toothbrush;

② If the selected mode is more than 5 seconds, short press "Power On" to turn off the toothbrush;

③ The toothbrush will automatically shut down after using for more than 2 minutes.

Usage mode:

+

Clean mode

Deep clean, solve the daily residual dirt.

+

Sensitive mode

Gentle touch clean, no burden on sensitive teeth.

+

De-plaque mode

High frequency and thorough cleaning, effectively remove stubborn tartar.

×

Massage mode

Relieve gum discomfort and maintain health.

×

Polishing mode

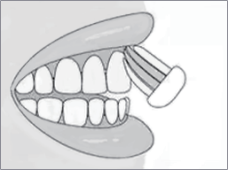

Polished teeth, radiant.

Recommended Pasteur method of tooth brushing

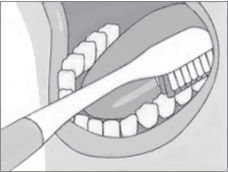

A smart shift pause reminder is provided every 30s during use.

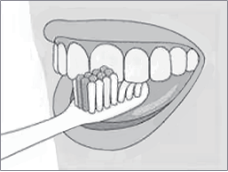

Place the bristles at a 45° angle along the gum line.

The bristles should touch the surface of the teeth and gums, in groups of 2~3 teeth, vibrate horizontally.

Brush the surface of the teeth, and then move the toothbrush to the next group of 2 to 3 teeth and repeat.

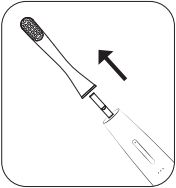

Rest the toothbrush on the occlusal surface of the posterior wisdom teeth and perform gentle back and forth strokes.

- 4 -

Cleaning method

1. Remove the brush head(as shown in the illustration at right) Remove the brush head vertically from the mounting head.

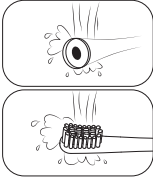

2. Wash the brush head.

Rinse the inside and bottom of your toothbrush well (as shown).

※ Do not pull hard on the bristles.

※ Do not use hot water above 80°C.

3. Wipe the toothbrush and water from the body and store them away.

※ Do not place the body in water.

※ Do not use hot water above 40°C.

Q&A

Q: The vibration of the toothbrush seems to be getting weaker?

A: The brush head may be connected to the host too tightly.

Please remove the brush head and install it.

Q: The electric toothbrush can't start?

A: Please consider whether the battery is insufficient; if the problem is still not resolved, it may be that the battery has reached the end of its life. Please contact the PESSIDO after-sales for replacement.

Q: I have charged, but the battery life is short?

A: Please make sure whether the toothbrush is placed vertically and steadily during charging; if the problem is still not solved, it may be that the battery has reached the end of its life.

Please contact the PESSIDO after-sales for replacement.
