3. Link the RexID Programmer

4. Click “Increase The Credit”, then Follow the prompts.

A screenshot of a web browser window titled "Apply Credit". The window has a light gray background. At the top, the title bar shows the text "Apply Credit" and standard window control buttons (minimize, maximize, close). The main content area displays the heading "Apply Credit" in a large, black, serif font. Below the heading, there is a line of text: "*It's FREE as long as purchasing RexID cards from us". Underneath this text is a text input field with a light gray border and a light gray background, containing the placeholder text "Please enter the number of credits you requested". Below the input field is a rectangular button with a blue border and a light gray background, labeled "Submit". In the bottom right corner of the window, there is a small icon representing a network connection.

5. If you know the format of your credential.

Just choose the right format on the software, to read or write.

6. If you don't know the format.

Please begin with "HDProx" on the left side of the tabs and work your way down the different protocols until identify the correct version.

7. If still not work after test all protocols.

please email : info@freevisioncorp.com

For Any questions on the User Manual or want more function of the RexID programmer, please feel free to email: info@freevisioncorp.com

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
