

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the external components of the EUT. At the top are two beige, C-shaped hearing aid housings with thin wires. Below them is a white, boat-shaped plastic component with the text "Audien Hearing" and three dots. To the right is a white, oval-shaped plastic component. A black ruler with white markings is positioned vertically on the left and horizontally at the bottom for scale. The background is a blue textured surface.
Solder Board-Component View 1	 A photograph showing the internal components of the EUT. It features a small green printed circuit board (PCB) with various electronic components, including a yellow component. A beige hearing aid housing is partially visible on the left. A thin wire connects the PCB to a small circular component on the right. A black ruler with white markings is positioned vertically on the left and horizontally at the bottom for scale. The background is a blue textured surface.

Solder Board-Component View 6	 A photograph of a small electronic component, likely a Bluetooth module, mounted on a green printed circuit board (PCB). The component is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler is placed on a blue textured surface. The component has a small black cable attached to it.
Antenna View	BT Ant.  A photograph of the same electronic component as in the first image, but from a different angle. A red box highlights a specific part of the component, and a red line points from the label "BT Ant." to this highlighted area. The component is next to the same black L-shaped ruler on a blue textured surface.
