

2 in 2 Charging Cable

User Manual

Technical Parameters

Cable Length: 120 cm

Material: ABS + Nylon

Input Voltage and Current: 5V/3A

Output Power: Type C 10W (max.), iWatch 2.5W (max.)

Effective Conversion Distance: 2m

Working Frequency: 328 kHz

Charging Speed: Offers a fast charging speed of over 2.5 hours

Merkmale:

It can charge an iPhone (or AirPods) and an Apple Watch simultaneously.

It is compatible with the latest system of the Apple Watch Ultra 3, Ultra 2, Ultra, SE, and Series 11, 10, 9, 8, 7, 6, 5, 4, 3, 2; as well as all models from the iPhone 15 to 16, 17 series.

Hinweis: Zum besseren Schutz vor Überhitzung verwenden Sie bitte den Originaladapter.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following

two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
