

<div>Solder Board-Component View 4</div>	 A photograph of a small green printed circuit board (PCB) component, likely a power MOSFET driver or similar power electronics module. The board is populated with several surface-mount components, including a large MOSFET, a gate driver IC, and various passive components like capacitors and resistors. It features a green terminal block on the left side with four pins. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows dimensions in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 50 mm.
<div>Solder Board-Component View 5</div>	 A photograph of a larger green printed circuit board (PCB) component, possibly a power supply or a more complex power electronics module. The board is densely populated with various surface-mount components, including a large MOSFET, a gate driver IC, and numerous capacitors and resistors. It features a green terminal block on the left side with four pins. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler shows dimensions in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 50 mm.

<div>Solder Board-Component View 6</div>	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a black metric ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 20 cm). The board is oriented vertically, with the ruler placed horizontally to its left.
<div>Solder Board-Component View 7</div>	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is positioned next to a black metric ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 20 cm). The board is oriented vertically, with the ruler placed horizontally to its left.
