

<div>Solder Board-Component View 14</div>	 A photograph of a small, rectangular printed circuit board (PCB) component, likely a graphics card, resting on a blue textured surface. The board is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features a central square chip with a green solder mask, surrounded by various electronic components, including capacitors and resistors. The board has a gold-plated edge connector.
<div>Solder Board-Component View 15</div>	 A photograph of a small, rectangular printed circuit board (PCB) component, likely a graphics card, resting on a blue textured surface. The board is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB features a central square chip with a green solder mask, surrounded by various electronic components, including capacitors and resistors. The board has a gold-plated edge connector.

<div>Solder Board-Component View 16</div>	 A photograph of a green printed circuit board (PCB) component, labeled '16', positioned next to a black metric ruler. The ruler shows measurements in millimeters, with markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100 mm. The PCB is rectangular and features several gold-colored circular pads, likely for mounting or testing. The background is a blue textured surface.
<div>Solder Board-Component View 17</div>	 A photograph of a green printed circuit board (PCB) component, labeled '17', positioned next to a black metric ruler. The ruler shows measurements in millimeters, with markings for 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100 mm. The PCB is rectangular and features several gold-colored circular pads, likely for mounting or testing. The background is a blue textured surface.
