

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A red cable connects it to a power line interface unit (PLI) on the floor. The PLI is connected to a power strip on the wall. To the right is a large wooden table.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The chamber is a large metal box with a door open, revealing a test setup inside. The walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A test item is mounted on a stand inside the chamber. The floor is made of metal plates with yellow and black safety markings.
