Specifications

Brand	YouthWhisper
Model	SuperQ3
Battery Capacity	200mAh
Standby time	Up to 20 days
Weight	1.06oz(30g)
Bluetooth protocol	A2DP,AVRCP,HSP,HFP
Wireless range	33 ft (10m)
Bluetooth® version	Bluetooth® v5.0
Continuous play	About 6 Hours
Charge time	2 Hours
Talk time	8 Hours
Maximum Charge Voltage	5.25V
Frequency range	20Hz~20KHz
Warranty	1 year

Warnings

Please read the following safety guidelines before using headphones.

1. Listening to audio at high volume for a long time may cause discomfort. Please use medium volume as much as possible to avoid using high volume for a long time.
2. In driving and other situations requiring concentration, please do not use loud volume. Please be careful.
3. If you wear a pacemaker or other electronic medical device, please consult your doctor before using it.
4. The correct way to wear this headphones is to place the bone conduction headphones in front of the ear over the temporal bone. Do not put the speaker inside the ear.
5. In order to avoid the accidental ingestion of the plastic bags and parts in the headphones packaging by children, please put the headphones and the packaging out of the reach of children.
6. This headphones resist sweat, but cannot be soaked in water.
7. If the headphone is overheated or damaged, please stop using it.
8. Please do not put the headphones where it s too cold or too hot which easily caused damage.
9. The headphones built-in lithium battery, please stay away from high temperature and open flame.
- 10 . Please do not disassemble or repair by yourself.

Thank you choosing us and Sorry for any inconvenience caused.

FCC Statement

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

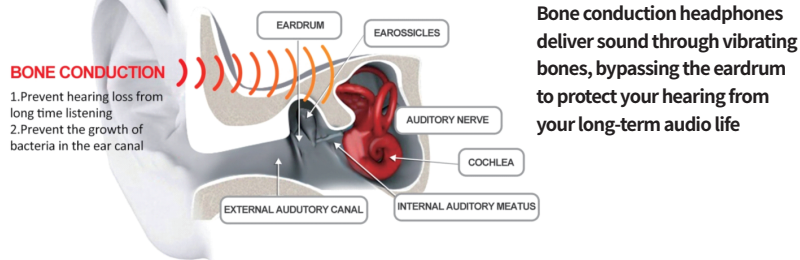

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution!

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Healthy for Ear

Instructions for user

How to use YouthWhisper SuperQ3

1. Charge

Charge via the Type-C cable. The indicator light is blue when charging is complete.

2. Bluetooth Pairing

Press the button + for 3 seconds to enter pairing mode, until the indicator flashes alternately in red and blue.

3. Connect

Turn on the Bluetooth settings of the mobile phone, select" **SuperQ3** "and hear the voice saying"Connected". The pairing is successful and the blue light flashes once.

Storage and maintenance

- 1. Headphones should be stored in a cool and dry place. The operating temperature should be 0~45°C. Working in too cold, too hot, or excessively humid environment may shorten battery life.
- 2. After a long time period of storage, please charge again before use.
- 3. Listening to music at too high volume may damage your hearing and the sound may be destroyed.
- 4. Please don't charge immediately after exercise in case that the headphones circuit will be damaged by the sweat remaining in the charging port.
- 5. Keeping the charging port dry before charging will reduce the risk of headphones damage.

Q&A

1. Why choose bone conduction headphones?

Bone conduction headphones protect against hearing hard caused by prolonged audio devices.

Bone conduction headphones transmit sound to your cheekbones via vibrations without passing through the external ear canal, protecting your hearing from the effects of prolonged audio life.

Ideal for people who like to listen without damaging their hearing.

Q&A

2. I want to change another device to pair with my headphone, how should I do?

If you want to pair it with a different device, please try to make it forget the first device (clear the Bluetooth connection records on the previous device) and then try to pair it with the other device again.

3. Why can I still hear the music after taking off the headphones?

After removing headphones, the vibration unit exposes to the air and push the air to transmit sound. Although the headphones are close to the skin when worn, there is still one side exposed to the air, and the leaking sound is barely audible to people around.

4. How to identify bone conduction headphones or common headphones?

After blocking the ear, the sound of the bone conduction headphoens will be clearer.

5. Are these headphones waterproof?

Yes, they are. They have passed IP66 water resistant test, you even can wash the sweat or dust on the surface of the headphone in under the tap(Don't immerse the headphone in water).

6. Can I call others and can they hear me clearly when I am driving the truck or motorcycle on the noisy road?

Yes, this model headphone has built-in CVC8.0 Noise Canceling dual microphones and ENC noise reduction technology can block 90% ambient noise, enhance voice pick-up, helping you make crystal clear calls even in a noise environment.

7. Can it connect to two devices simultaneously? How to set it?

Yes, it supports multi-points connection. It can connect with two devices simultaneously. Please set it as the following steps:

- (1) turn on the headphone and enter pairing mode.
- (2)open the Bluetooth menu on 1st device and search "SuperQ3" and connect it.
- (3)close the bluetooth menu on 1st device and then open the Bluetooth menu on 2nd device and search "SuperQ3" and connect it.
- (4)at last, open the Bluetooth menu on 1st device again, you will find the headphone also connect to it again.

8. Why I can't listen to the music in the other device although the headphone is connected to two devices simultaneously?

We can't hear the sound from the two devices simultaneously although the headphone has already connected to the two devices.

After 2nd device was connected, music on 1st device you connect first will pause play and the headphone will play the music on 2nd device you connected last.

If you want to listen to music in the 1st device again, you need to pause the music play on the 2nd device you are using now.
