

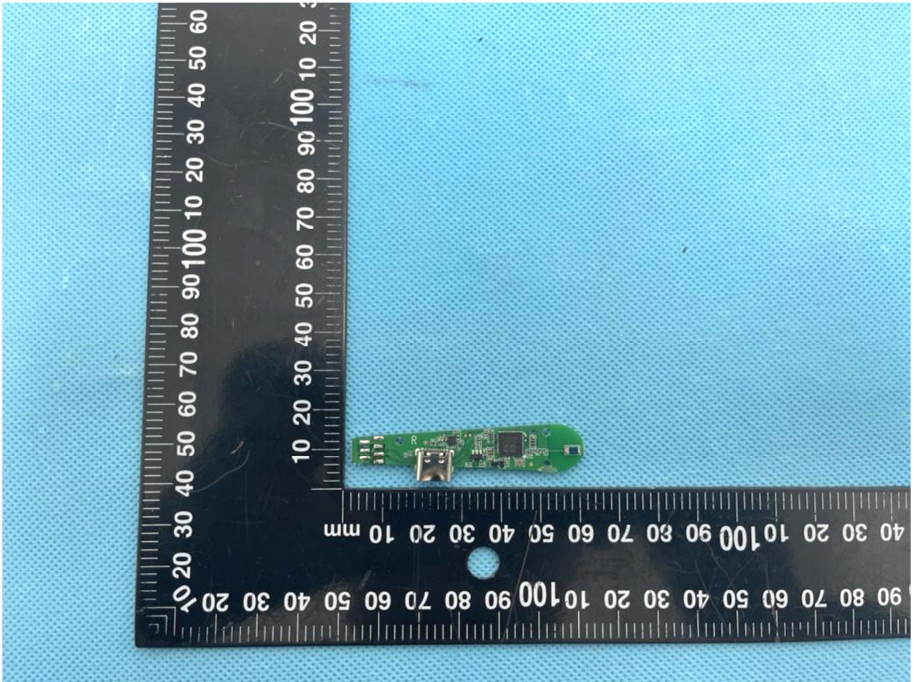

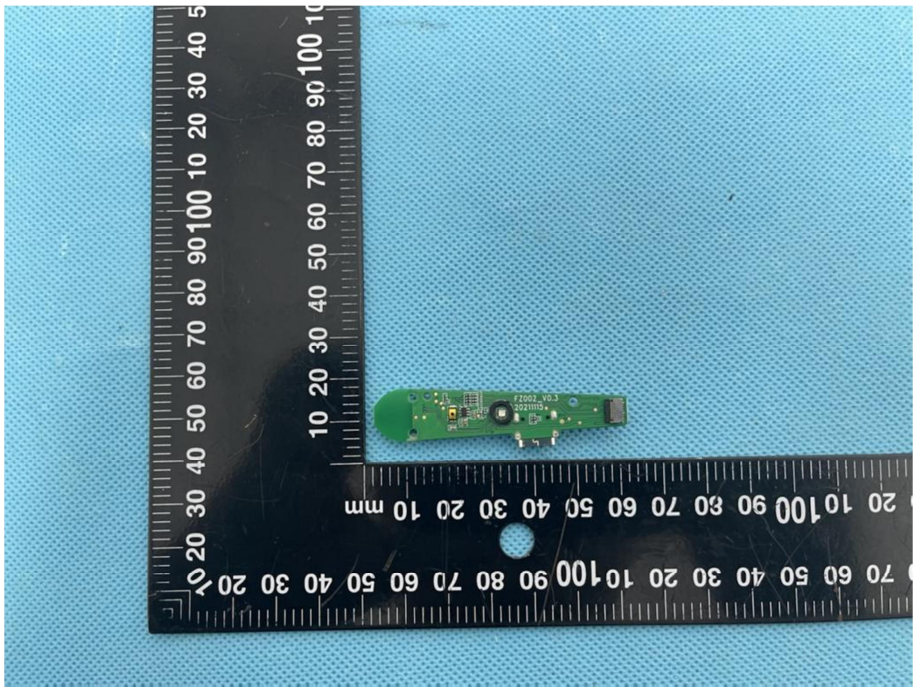

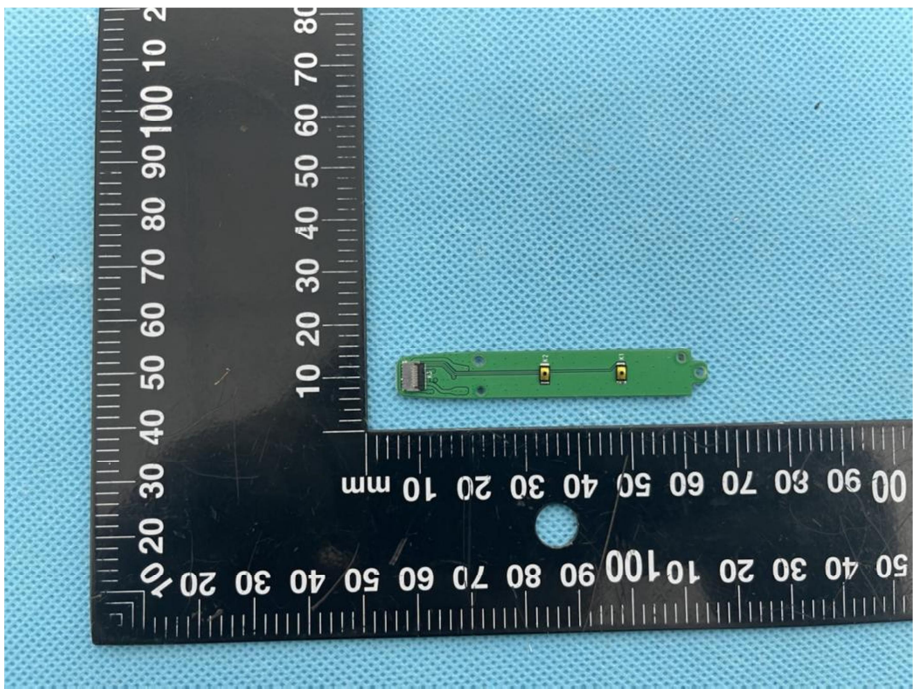

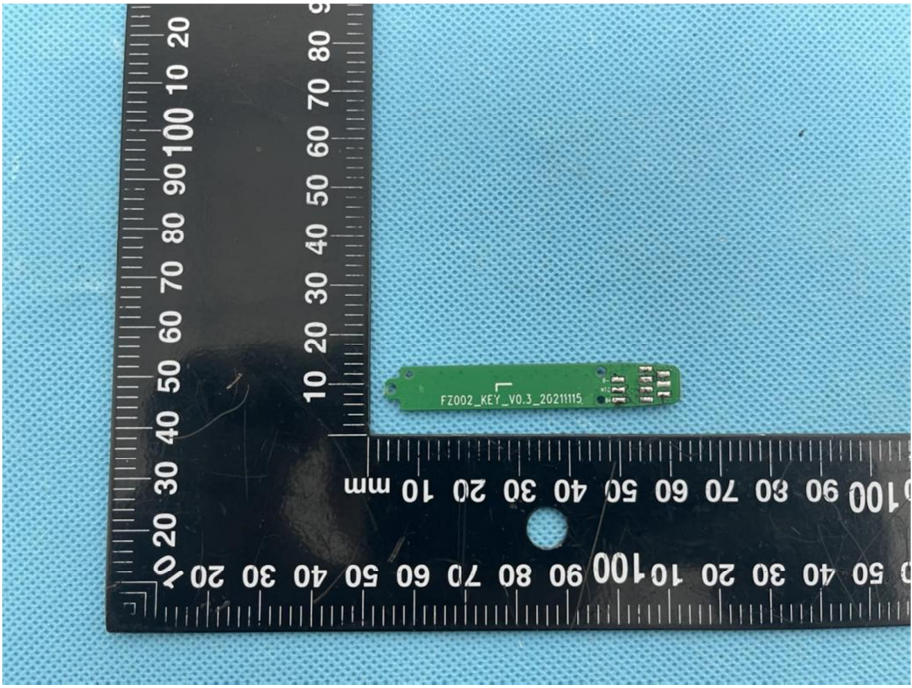

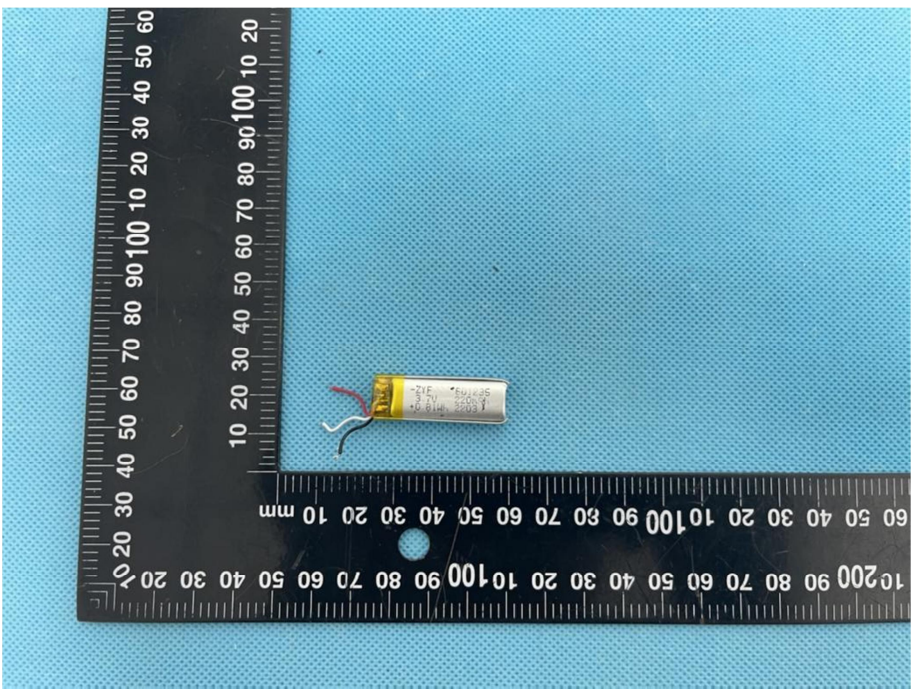

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the EUT housing and board assembly. The assembly consists of a black plastic housing with two earbuds attached by wires. A small green circuit board is visible inside the housing. A black L-shaped ruler is placed next to the assembly for scale, with markings in millimeters and centimeters.
Solder Board-Component View 1	 A photograph showing a close-up of the solder board component. The component is a small green circuit board with various electronic components, including a microcontroller and several resistors. A black L-shaped ruler is placed next to the component for scale, with markings in millimeters and centimeters.

Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) component, labeled 'F2002 V0.3', positioned next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The component is oriented horizontally, and the ruler is placed vertically and horizontally to provide scale. The background is a light blue textured surface.
Solder Board-Component View 3	 A photograph showing the same small green PCB component, labeled 'F2002 V0.3', positioned next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The component is oriented horizontally, and the ruler is placed vertically and horizontally to provide scale. The background is a light blue textured surface.

Solder Board-Component View 4	 A photograph showing a small green printed circuit board (PCB) component with gold-colored solder pads. The component is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters. The component is oriented horizontally, and the ruler is placed vertically and horizontally to provide scale. The component has some text printed on it, including "F2002_KEY_V0.3_20211115".
Solder Board-Component View 5	 A photograph showing a small yellow and silver cylindrical component, likely a battery or capacitor, with two thin wires (one red, one white) attached. The component is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters. The component is oriented horizontally, and the ruler is placed vertically and horizontally to provide scale.
