The relative humidity is 45% - 85% 3. The air pressure is 86kpa-106kpa	Normal electrical and mechanical performance
High and low temperature test	Conduct 5 cycles between $70\text{ }^{\circ}\text{C}$ and $40\text{ }^{\circ}\text{C}$, and then check the appearance quality under normal conditions for 1-2H.	The size shall meet the requirements and the mechanical and electrical properties
Constant damp heat resistance test	Relative humidity: $95\pm 3\%$, test temperature: $40\text{ }^{\circ}\text{C}$ After the test object is taken out for 2h, the electrical performance shall be measured within 5min. The appearance quality of the test object shall be checked for 1-2h under normal conditions	The size shall meet the requirements and the mechanical and electrical properties
vibration test	Vibration frequency range: 10-55HZ, displacement amplitude: 0.35MM, acceleration amplitude: 50.0M/s, frequency sweeping cycles: 30 times	Normal electrical and mechanical performance
