is fully charged.

Discharging Protection

- When battery is overloading or short circuit, it would stop output automatically
- When battery voltage is lower than 2.5v, Power source will shut down automatically

SPECIFICATION:

- Dimensions: 128X60X45 (mm)
- Weight: approximately 270g
- Maximum power consumption: 0.5W
- Frequency range:
 - AM 520~1710 KHz
 - FM 87~108 MHz
 - WB: 162.400~162.550 MHz
- Working voltage: 2.7V~4.2V
- Power source: 2000mAh Li-ion battery.

CARE AND MAINTENANCE:

- Wipe the outside of the unit with a soft, damp cloth.
- Clean the lens with a standard lens cleaning product.
- Do not clean unit with harsh abrasive or any solvents.
- Unit is NOT waterproof totally---only waterproof Ip_{x3}. DO NOT submerge in water.
- When unit is idle over 60 days, Or FIRST USE. Please hand crank or sunlight recharge for 3 to 5 minutes to activate the internal battery.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
