If you do not use this product for a long time, please pour out the water in the water tank, wipe dry and place in a dry place.
- Please clean the inside of the container with neutral detergent before next use.

ATTENTION

- A slight difference in spray concentration is normal.
- Factors that affect this include water type, humidity, temperature, air currents.
- If there is no water in the water tank, pressing the "MIST" button will not turn on diffuser, and the diffuser cannot be used without water.
- Only 100% natural essential oil can be used in this product. Oils contain chemical fragrance, spice or impurities may cause malfunction.
- Clean the unit as per the maintenance instructions before changing to a new type of essential oil.

ACCIDENTAL LEAKAGE

In the event of unit being knocked over or tipped during use, please follow the steps below to avoid malfunction

- Unplug the unit and remove cover
- Drain out any remaining water from the drainage side;
- Shake the unit gently to drain any water inside the mechanism, allow drying for at least 24 hours.

MAINTENANCE

- After using 5-6 times or 3-5 days, please clean the product as follows.
- Unplug the unit from mains supply and remove cover.
- Drain out any remaining water from the "drainage side" of the tank:
- Dilute a small amount of kitchen detergent in warm water, and then wipe the product with a rag.
- Do not use phenethyl alcohol, a medical diluent, or it may damage the product or erase various marks on the product.
- Note: Please use neutral detergent.

PRECAUTIONS

- Do not change, dismantle or repair the unit if you are not the technician. Please contact the selling department to repair it if necessary.
- Do not intentionally stab, twist or stretch the wires on the power adapter. Do not place the power cord in high temperature. Do not press the wires with heavy objects, and do not clamp or repair the wires with clamps.
- If the cable on the adapter is damaged or the socket becomes loose, please stop using it.
- If there is peculiar smell, noise or abnormal heat, it means that there is something wrong with the product or adapter. Please quickly unplug the adapter from the power socket and stop using it.
- Do not use the adapter in water, and do not store the adapter in damp places, such as bathrooms, changing rooms, greenhouses, etc.
- To ensure hygiene, the water in the water tank must be completely poured out from the drainage side after each use and wiped clean with a rag.
- Aromatherapy essential oil may cause staining. If it rises unexpectedly, wipe it with a rag immediately.
- Use a measuring cup to add water to the water tank. Do not directly use the tap to fill water.
- Do not spray directly on furniture, clothes or walls. Avoid direct sunlight, close to air conditioners, fans or high temperatures.
- It should be placed in a flat position, not on carpets, mats or uneven places.
- Avoid being placed next to electrical appliances such as televisions and speakers.
- This product should not be covered, which may cause water accumulation in the fuselage and damage the product.
- After working for a long time, it should be turned off for 60 minutes before being turned on to avoid damage to the ultrasonic board.
- Only suitable for tap water and purified water. Do not move the product during use.
- When your hands are wet, don't touch the product to avoid electric leakage.
- Keep out of reach of children and correctly teach children not to play with products.
- The product is not suitable for children or people who lack knowledge and experience of the product.

TROUBLESHOOTING

Please refer to the below in the event of the product operating abnormally

The aromatherapy machine will automatically turn off within one second after the switch is turned on.	Please confirm whether there is water in the container? Or is there enough water? --- Please add water to the container. Is the AC adapter connected with this product properly? --- Please confirm that this product is connected to the adapter. Please unplug the DC plug from the bottom and plug it in again, and then try again.
There is no spray or spray abnormality.	Is there too little water in the container? Or too much? --- Please add water to the container. If the water in the container exceeds 200ML, an abnormality may also occur.
Water leakage	Is the upper cover properly covered? --- Reinstall the upper cover. Too low or too high? --- If the temperature is too low or too high, the fog on the surface can easily gather together to form water droplets.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
