What's in the Box

Wireless NVR

Battery Camera

Solar Panel

3.3ft (1m)
Network Cable

10ft (3m) USB-
C Extension Cord

Solar Panel
Mounting Bracket

USB Mouse

HDMI Cable

Camera
Holding Bracket

NVR Power Adapter

Pack of Screws

Reset Needle Pin

Surveillance Poster

Quick Start Guide

Screw Positioning Stickers

Note: Quantity of devices and accessories vary by different models that you purchase.

Introduce the NVR

EN

- ① Network Status LED
- ② Storage Status LED
- ③ Power Status LED
- ④ HDMI Port
- ⑤ USB Port
- ⑥ MicroSD Card Slot
- ⑦ Ethernet Port
- ⑧ Reset Hole
- ⑨ USB Port
- ⑩ Power Port

Introduce the Camera

- ① USB-C Charging Port
- ② Pair/Power* Button
- ③ Micro SD Card Slot
- ④ Speaker
- ⑤ Microphone
- ⑥ Photosensitive Sensor
- ⑦ Camera Lens
- ⑧ Red and Green Light
- ⑨ Spot Light
- ⑩ Infrared LED
- ⑪ Indicator Light
- ⑫ Solar Panel
- ⑬ Solar Panel Bracket
- ⑭ PIR Sensor

Indicator Light Status	Description
Red light is solid on	Camera is booting
Infrared LEDs flashing	Waiting for pairing
Green light is solid on	Camera is charging
Blue light is flashing	Remote preview
Purple light is solid on	Camera is upgrading
Red & Blue light is flashing	Network Error
Off	Sleep Mode / Fully Charged

*Power Button:

1. Press and hold for 3 seconds to turn on the camera when it is off.
2. Press and hold for 8 seconds to turn off the camera when it is on.

Expanding Storage(Optional)

The NVR comes with a pre-installed 32GB/64GB(vary by different models) SD card for saving video recordings and allows you to add an additional hard drive to expand the space whenever necessary.

Prepare Your Hard Drive

Your hard drive must meet the following requirements:

Type	Hard disk drive (HDD) or solid state drive (SSD) that uses the SATA interface
Size	2.5 inch
Capacity	Unlimited
Recommended	Western Digital, Seagate, SAMSUNG, Toshiba, Kingston, PNY, Crucial, SanDisk

A new hard drive must be formatted. You may need to transfer all the data from your hard drive to a secure location if necessary.

Install Your Hard Drive

NVR must be powered off when you install or remove a hard drive.

1. Push down the bottom lid to remove it.
2. Loosen the screw, then pull out the hard drive bracket.

3. Fix your hard drive to the bracket with the provided screws.

4. Insert and screw the bracket back to NVR, then put the bottom lid back into place.

Charging the Camera

We recommend fully charge the cameras before first use.

Indicator Light Status	Description
Green light is solid on	Camera is charging
OFF	Fully charged

Setting Up the System

EN

1. Connect the included power adapter to the NVR, wait a few minutes for the system to start up.
2. Connect the NVR to your router using the included Ethernet cable. And then, connect the USB mouse to the USB port of the NVR.

3. Connect the NVR to the monitor with a HDMI cable. (Optional, if you wish to monitor on a screen)

4. To turn on the camera, press and hold the power button located at the bottom of the camera for 3 seconds. It will automatically connect to the NVR via a wireless signal.

5. Download and install the free “Napcat Life” app from the App Store (iOS devices) or Google Play (Android devices).

Napcat Life

Or Download the APP by scanning below QR code.

6. Run the “napcat Life” app, sign up for a Napcat Life account. then login with your account ID, tap “+ Add Device” and scan the setup QR code on the Device Bottom (remove the bottom lid). Or scan the setup QR code in the NVR menu, and then follow the in-app instructions to add the NVR to the device list.

Mounting the Camera

Option 1: Mount the Camera with the Solar Panel Attached (Less Drilling)

If you mount a location without eaves and sunlight is not obstructed, install the solar panel directly on the top of the camera with the solar panel's mounting bracket.

1. Install the solar panel onto the solar panel's mounting bracket by turning it.

2. Secure the power cable of the solar panel onto the bracket's slot.

3. Drill holes with a 6.0 mm drill bit with the included positioning card, then insert the anchors into the holes.

4. Install the camera onto its mounting bracket by turning it clockwise until it clicks into place.

5. Tighten the locking screw on the mount bracket, and then adjust to the angle you need.

6. Connect the USB-C connector to the USB-C port of the solar panel.

Option 2: Mount the Camera and the Solar Panel Separately (Best for Strong Solar Power)

If the camera is blocked, install the solar panel independently and use the provided USB-C extension cable to get strong solar power. The camera can be mounted on a wall or on the ceiling.

1. Disassemble the Solar Panel Mounting Bracket.

2. Install the mounting bracket of the solar panel in a suitable position.

3. Install the solar panel onto its mounting bracket by turning it, then adjust the angle.

4. Install the camera

Drill holes with a 6.0 mm drill bit with the included positioning card, then insert the anchors into the holes.

5. Install the camera onto its mounting bracket by turning it clockwise until it clicks into place.

6. Tighten the locking screw on the mount bracket, and then adjust to the angle you need.

7. Connect the solar panel to the camera using the provided USB-C extension cable.

Camera Holding Bracket

The camera holding bracket can be used for placement and adjustment of angles when a mounting bracket is not required in some scenarios.

Camera Holding Bracket

Pair your add-on camera or re-add existing camera to your NVR:

Option 1: Using the "Napcat Life" app, from the Live view, tap the "... " button, and then tap "Pairing" to start the pairing process. You will have a 180-second timer to pair with your Camera.

Press the camera pair button three times within three seconds to start pairing with your NVR. A "Pairing Successful" message should appear on the screen. If you do not see this message, repeat the steps above.

Option 2 : You can also add the camera via the Monitor, tap the "pair" button on NVR Live View menu to start the pairing process.

Press the camera pair button three times within three seconds to start pairing with your NVR. A "Pairing Successful" message should appear on the screen. If you do not see this message, repeat the steps above.

Troubleshooting

No video output on the monitor

If there's no video output on the monitor from NVR, please try the following solutions:

- Monitor resolution should be at least 720P or above.
- Hold down right mouse button for 10 seconds to restore default resolution.
- Double check the HDMI connection, or swap another cable or monitor to test.
- If it still doesn't work, please contact Napcat Support: support@napcat.net

Notification of Compliance

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing Administrator, Inc. in the United States and other countries.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The transmitter/receiver exempt from licensing contained in this device complies with Innovation, Science and Economic Development Canada's (ISED) regulations applicable to license-exempt radio apparatus. Operation is subject to the following two conditions:

- (1) This device must not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

IC Radiation Exposure Statement:

This equipment complies with the radiation exposure limits set forth for uncontrolled environments in Canada. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

CE Simplified EU Declaration of Conformity

Napcat declares that this device is in compliance with the essential requirements and other relevant provision of Directive EN300328, EN301489-1, EN31489-17, EN IEC 62311, EN IEC 62368.

Correct Disposal of This Product

Please recycle this product responsibly to promote the sustainable reuse of material resources and avoid potential harm to the environment.

Correct Disposal of This Product

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environment safe recycling.
