

Smart Motion Sensor Night Light Model: TM-X1001W Product Description  Front View Right Elevation Distribution network key function 1 Press and hold for 3 seconds (the white light sensor will flash 3 times) to enter the network distribution mode. 2 Short press to turn off the light >> press the third time to turn on the light.	Product Feature 1 Intelligent human body induction night light energy saving and environmental protection. 2 Five-color light APP intelligent adjustment. 3 The sensor distance is about 5 meters. 4 The sensor angle is 120°. 5 Five-color light APP intelligent adjustment. Press for 3 seconds (the white light flashes slowly in a breathing state) to enter the light >> press the sensor night light mode again >> press the third time to turn on the light. Technical Parameters 1 Induction Angle: 120° 2 Induction Distance: 5m 3 Working Voltage: 5V 4 Working Current: 5mA 5 WiFi IEEE802.11 b/g/n (2.4 g) Download APP and connect Two smart is available for both IOS and Android. Support 	Set Up Router Night light only supports 2.4GHz wifi router, not 5GHz router, please set the relevant parameters of the router to support 2.4GHz. Connectors such as -l @43% 84% etc. When possible to the router to speed up the configuration of the night light. APP Registration Please keep network on/kick Go to the APP, click "Add Device", and enter the "Privacy Policy" and click "Agree". Then log in the APP.	Configure Network for Click "Add Device" in the APP, then open the APP, and click the "Add Device" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window. 	Click "Add Device" in the APP, then open the APP, and click the "Add Device" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window. 	Click "Add Device" in the APP, then open the APP, and click the "Add Device" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window.  Click "Add Device" in the APP, then open the APP, and click the "Add Device" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window.	 	Click "Add Device" in the APP, then open the APP, and click the "Add Device" icon to add a device at the same time, night light, and the light flashes slowly to enter the pairing state. At this point, the APP pops up a device discovery pop-up window. 	Product Installation  The sensor must only be inserted into indoor wall panel or household row. CAUTION 1. This product is not waterproof test, please do not use it in wet places. 2. Do not use this product as a toy for children in case of not to cause damage or danger. 3. This product is strictly prohibited to disassemble, so it will lead to functional failure. 4. Please do not use this product in a high temperature environment. 5. Please do not use this product in a high humidity environment. 6. This product must be subject to transport failure in case of not to cause damage or danger. 7. Please do not use this product in a high humidity environment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
