View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'D255A', positioned on a blue textured surface. The component is rectangular and features a grid of 12 circular solder pads arranged in two columns of six. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Another black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters (0 to 50 mm) and centimeters (0 to 5 cm).
Solder Board-Component View 2	 A photograph of the same green printed circuit board (PCB) component, labeled 'D255A', positioned on a blue textured surface. The component is rectangular and features a grid of 12 circular solder pads arranged in two columns of six. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Another black ruler with white markings is placed vertically to the left of the component, showing measurements in millimeters (0 to 50 mm) and centimeters (0 to 5 cm).

Solder Board-Component View 3	 A photograph showing a rectangular copper-colored component with two small circular holes and a small metal spring-like structure at the bottom. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10).
Antenna View	433.92MHz Antenna  A photograph showing a green printed circuit board (PCB) with various electronic components, including resistors, capacitors, and a small antenna structure. The PCB is placed on a blue textured surface next to a black ruler with white markings. A red box highlights the antenna structure, and a red line points from the text "433.92MHz Antenna" to it. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10).
