

instructions

Take out the two headphones from the charging bin respectively or open the cover of the charging bin. When waiting for pairing, the red and blue lights of the two headphones flash. The two earphones will be turned on automatically and paired. When the red and blue lights of the earphones flash slowly, it indicates that the earphones have been paired successfully. Turn on the Bluetooth function of the mobile phone, search "x15" and click Connect. After connecting, the two headphones do not flash.

Operation function description

- 1. Power on  
Mode 1: pick up the headset from the charging bin and start it automatically  
Mode 2: press and hold the headset for 5 seconds to shut down the power on state
- 2. Shutdown

Charging in the charging bin: plug in the power supply to charge the charging bin, the running light flashes, the display screen displays the current charging power during charging, and 100 is always on after being fully charged  
Power display: the real power of the headset can be displayed in the upper right corner of the phone

Product description

Product model: x15  
Bluetooth version: v5.2  
Bluetooth protocol: HFP, HSP, A2DP, AVRCP  
Working voltage: 3.7-4.2V  
Charging voltage: earphone 5V / 1mA, charging box 5V / 1A  
Headset battery capacity: 40mAh  
Charging bin capacity: 300mAh  
Transmission distance: 10M  
Talk time: 4 hours  
Playback time: 4 hours  
Headset charging time: 1-1.5 hours  
Charging time of storage box: 1-2 hours  
Support system: all Bluetooth enabled devices and mobile phones  
Packing list: charging bin \* 1, headset \* 1,  
Data cable \* 1, manual \* 1

common problem:

- Q: Does the charging chamber charge?  
A: Please try changing a data line, or check whether the interface is connected properly.
- Q: Does the headset charge?  
A: Make sure there is power in the charging compartment, take and put the earphone several times more, press the earphone with your hand to make the charging contact fully contacted.
- Q: Is the earphone signal unstable or the earphone does not sound?  
A: Please wear earphones in the right way. Do not use them with partition walls or obstacles.
- When using outdoors, please put your mobile phone on as much as possible in your pocket.

- Q: Two "X15" pairing names appear when searching Bluetooth?  
A: You need to delete the two pairing names on the mobile device, take them out from the charging bin, reconnect them, and then connect the mobile phone
- Q: Is the answering voice on or unclear?  
A: Please try to turn the volume of the headset or mobile phone to the maximum, and the mobile phone should not be too far away from the headset.
- Q: How to connect two earphones to two mobile phones?  
A: Take a headset out of the charging compartment, turn on the red and blue lights automatically, turn on the Bluetooth of the mobile phone and search the X15 connection (connection successful: do not flash). After the first headset is successfully connected to the first mobile phone, turn on the second headset and the second headset. Two cell phone connections.

matters needing attention:

- 1. Please use this product in an effective environment (no obstruction of 10 meters). If the distance exceeds the effective distance, it may get stuck and disconnected. Please use it correctly according to the instructions.
- 2. When charging the charging cable, 5V / 1A charger shall be used. Do not use fast charging or other chargers with voltage higher than 5V.
- 3. Please keep away from Wi-Fi, router and other high-frequency transmitting equipment as far as possible to avoid affecting Bluetooth signal reception.
- 4. Do not remove or refit the earphone for any reason. Do not let the earphone contact with corrosive liquid. Otherwise, the earphone may fall and burn, which are not covered by the warranty.
- 5. Do not use the equipment in thunderstorm weather. Thunderstorm may cause abnormal operation of the equipment and increase the risk of electric shock.
- 6. Please avoid using this device light near the eyes of children or animals.
- 7. Do not use the equipment in the environment with too high or too low temperature (below 0 °C and above 45 °C).

Warning!

This product contains built-in lithium battery. Do not expose this product to strong sunlight, bake or throw it into the fire to avoid explosion.

## **FCC Warning**

### **15.19 Labeling requirements.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **15.21 Information to user.**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **FCC RF Radiation Exposure Statement:**

- 1.This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- 2.This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.
- 3.This equipment should be installed and operated with minimum distance 5mm between the radiator and your body.

### **15.105 Information to the user.**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
