

HolidayCoro

Model: FMTXV2

FM Transmitter

Attention

- Use of this product must comply with local regulations.
- Do not use this product in flammable/explosive environments such as gas station/extreme hot places.
- Do not use this product outdoors during thunderstorms.

Packing List

- FM transmitter unit - 1 pc
- DC12V Power adapter - 1pc
- 3.5mm stereo audio cable - 1pc

Warning:

Changes or modifications not expressly approved by HolidayCoro could void the user's authority to operate the equipment.

Specifications

Item#	Attribute	Value
1	Working Voltage	DC 12V
2	Working Current	35mA
3	Transmit Distance	100 feet
4	Frequency Range	88.1-107.7Mhz
5	Frequency Resolution	0.1Mhz
6	Output Impetance	50Ω
7	Degree of Separation	≥35 dB
8	SNR(Signal to Noise Ratio)	≥60 dB
9	Audio Frequency Input Range	50Hz-18KHz
10	Unit Size (antenna included)	200*63*25mm
11	Unit net weight	135g

Buttons Instruction

Last frequency will be restored automatically.

Federal Communications Commission Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
