

User Manual

The product is connected to Apple Find My via Bluetooth. The product can be placed with other items, and the general location information of the product and other items will be displayed on the APP. After entering the Bluetooth connection range of the product, the Find My APP can make the product emit lights and sounds, so as to quickly Find the corresponding items. When the product is beyond the range of Bluetooth connection, as long as Apple-related devices with Find My function appear near the product, the product will send the latest location information to the owner Apple device through the cloud. The whole process is encrypted and only the owner can get it. Non-owner devices, including Apple officials, cannot get it.

FCC Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has evaluated to meet general RF exposure requirement. The device can be used be in portable exposure without restriction.
