

Antenna specification

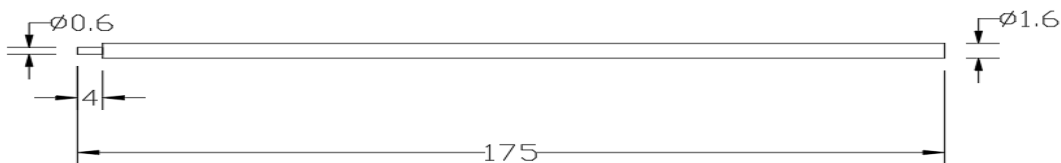

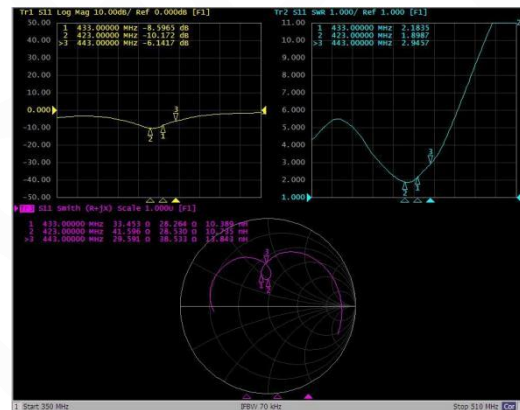

433M Wire antenna

Characteristic

1. Wide operating frequency range and low cost;
2. High gain and high efficiency, excellent and stable performance;
3. Direct welding, easy to use;

Application scenario

1. It is applied to various 433MHz wireless devices for indoor use;
2. Smart home gateway, routing gateway, repeater, widely used

Unit: mm

Electrical Properties

Frequency:	433MHz
Impedance:	50Ω
/VSWR:	<2.4
Gain:	0dBi
Polarization:	vertical Omni

Mechanical Properties

Conn&Cable:	/
Material&Color:	copper
Mounting:	Solder
Size:	175±2mm
OperateTemp:	-20 ~ 75 °C
