

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. On the left is a black plastic housing with a white flexible circuit board (FPC) and a yellow tape. On the right is a black circular component with a silver ring. A black ruler with white markings is placed below the components for scale.
Solder Board-Component View 1	 A photograph showing a solder board component. A green printed circuit board (PCB) with various electronic components is connected to a white flexible circuit board (FPC) by two thin wires. A black ruler with white markings is placed below the component for scale.

Solder Board-Component View 2	 A photograph showing a circular black component with a central hole, connected to a green printed circuit board (PCB) by two thin white wires. The component is positioned on a blue textured surface. A black ruler with white markings is placed vertically and horizontally to provide scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Antenna View	 A photograph showing the same circular component from a different angle, revealing its internal structure as a spiral coil antenna. The component is connected to the same green PCB by two thin white wires. A red rectangular box highlights the spiral coil, and a red line points from the text "Coil Antenna" to this box. The component is positioned on a blue textured surface. A black ruler with white markings is placed vertically and horizontally to provide scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
