

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a power supply or amplifier) sits on a wooden workbench. A red cable is connected to it and runs across the floor to a power line filter unit. To the right, another wooden workbench is visible, with a small black component on top. The background shows a plain wall with electrical outlets.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test setup. The room is lined with white, square-shaped electromagnetic shielding absorbers. In the foreground, a piece of equipment is mounted on a wooden crate, with a metal frame structure above it. In the background, a white, box-like structure sits on a circular platform. The floor is marked with yellow and black diagonal stripes.
