

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. On the left is a black plastic housing with a green printed circuit board (PCB) attached to its bottom. A white flexible ribbon cable is connected to the PCB with a yellow solder bridge. To the right is a separate black plastic component, possibly a lid or another part of the housing, featuring a silver-colored circular ring. Both items are placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.
Solder Board-Component View 1	 A close-up photograph of the solder bridge connecting the white flexible ribbon cable to the green PCB. The yellow solder bridge is clearly visible. The PCB has various electronic components, including a microcontroller and several surface-mount components. The assembly is placed on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) with a circular component (likely a coil antenna) soldered to it. The component is dark and has a hole in the center. Two thin wires are connected to the component. The PCB is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Antenna View	Coil Antenna  A photograph showing the same green PCB and circular component from a different angle. The component is a coil antenna, with its internal structure visible. A red box highlights the coil, and a red line points to it from the label "Coil Antenna". The PCB is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
