Date: 05-01-2023

Ref: Attestation of Duty Cycle Limit
FCC ID: 2A818-1000350

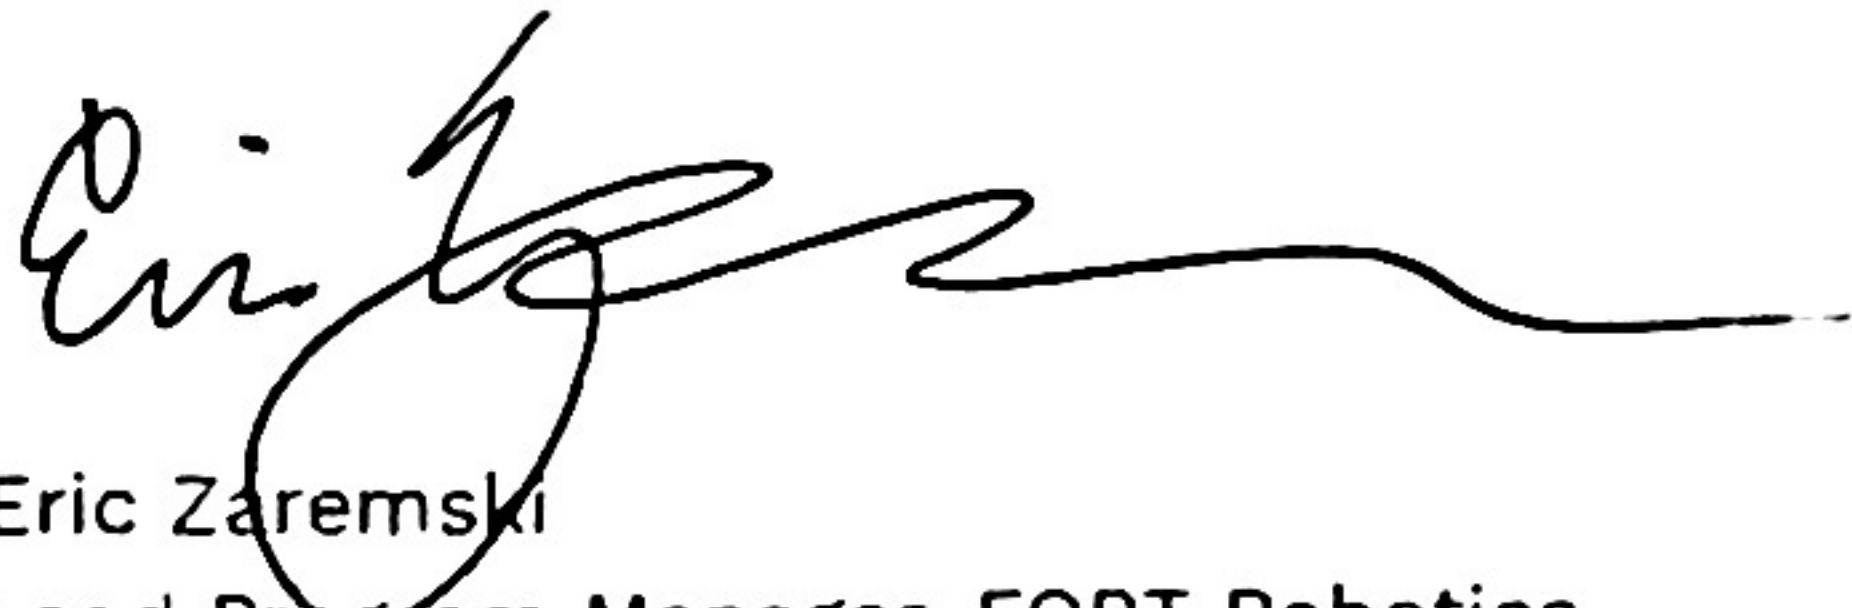

Fort Robotics attests that the following host devices operating duty cycle shall not exceed:

66.66% for Safety Remote Control (SRC)

12.5% for Wireless Emergency Stop (WES)

Both products have a fixed packet size and fixed transmit cadence that is not adjustable by the end user. The result is that the duty cycle is fixed and compliance with SAR limits is assured if used as directed by their respective product manuals.

Regards,

A handwritten signature in black ink, appearing to read 'Eric Zaremski', with a long horizontal flourish extending to the right.
