1. WIFI antenna

1. Specifications

This acknowledgment mainly provides the testing status of the electrical and structural performance parameters of the WIFI antenna of the LSC02 project. Down

The picture is a picture of the WIFI antenna designed by Tianda.

1.1. Electrical specifications

1.1.1. Electrical performance indicators

The working frequency band of the antenna for this project is 2400-2500MHz. The following is the electrical performance of the antenna designed and trial produced by Tianda.

index.

WIFI		
frequency band	frequency (MHz)	VSWR
WIFI	2400~2500	≤2.0

1.1.2. Matching circuit diagram

The matching circuit of the WIFI antenna is the original matching of the motherboard (0 ohm resistor in series) and has not been changed.
