Turn on/off the speaker

Screenshot

Playback 'switch 'Micro SD memory' and 'Cloud storage'

Take a video for the live view

Microphone - Speak to the smart device side.

Click the "Calendar" icon on the right top corner , then choose the date to playback the vicoes from cloud storage.

Choose the desired date to check all videos from the cloud.

SPECIAL NOTES!

- 1) The device is equipped with a rechargeable lithium battery. The battery life will be affected by the device wake-up time and the number of wake-ups. Therefore, the PIR sensor alarm detection function is used in an environment with a lot of people. It is recommended to turn off or set the device to low sensitivity to reduce device wake-up and call times extend battery life.When the battery is low, please charge the battery immediately.
- 2) It is a delicate device with low power consumption design. Everytime the device is awakened and will work for few seconds.After that, the device will enter standby mode to save power. You can set the work time in the app settings.
- 3) If android phone not receive the notifications, because android system blocked, its need to open the app's self-starting function in your phone to receive push messages.
- 4) This device provides one month of free cloud storage and face recognition services. If you need to continue using value-added services after the trial period expires, you need to purchase them in the app.

Technical Specification

Resolution	2.8mm
Field of Angle View	4MP @F2.1/155°
IR LED	6*850nm
Audio	Two-way talk with noise cancellation
Recording	TF card (Above C10 high speed brand card is needed)
Storage	Cloud Storage or up to 128G TF card
Battery	3pcs 21700 batteries are required.
Monitoring	Motion Detection, Remote Live View
Notifications	Push Notifications within1 second
Device Wakeup	Within600 ms
Power Consumption	Power Consumption Standby120 uA, Working170 mA
White light	Support white lights
PTZ	Horizontal angle:355°, Vertical angle:90°

Function Introduction

- 3 built-in 21700 battery cells with 14400 mAh
- Million HD Pixels with Ultra-thin 2.8MM Wide-Angle Lenses
- Support waking up device by mobile phone within 1 second.
- 4G connection
- High quality two-way talk with noise cancellation
- Support PIR human body infrared detection. It will push alarm information to your mobile phone APP immediately when someone is at the door
- Day and night mode can be switched automatically. The image is clearly and visible for your safety and family security no matter its day or night.

Q&A

Q: The device is online and there is a trigger event, but the mobile phone cannot receive the push message

Turn off "battery optimization" and turn off the function of end app when phones in standby (The mobile phone manufacturer's optimization method is inconsistent. Please take the actual situation as the standard.)

Q: What power supply mode does the device support?
A: The device can work with two 21700 battery alone

Tip:There will be no further notification of any change of the above functions. Please take the actual object as the standard.Thanks!

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user' s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any otherantenna or transmitter.
